

TABLE OF CONTENTS

PREFACE	pag.	1
1. Mathematical Models	"	7
1.1. Governing dynamical equations	"	7
1.2. Initial, free surface and boundary conditions	"	14
1.3. Boussinesq approximation	"	19
1.4. Linearized models	"	23
1.5. Porous flow models	"	26
2. Numerical Methods for Porous Flow Models	"	30
2.1. Velocity difference equations	"	30
2.2. Pressure evaluation	"	34
2.3. Approximation of free surface motion	"	50
2.4. Special boundary conditions	"	54
2.5. Flow through a porous dam	"	59
2.6. Mass transport in porous media	"	69
2.7. Seawater intrusion in aquifers	"	75
2.8. Stability considerations	"	79
2.9. Summary of a calculational step	"	87
3. Numerical Methods for Models with the Boussinesq Approximation	"	89

3.1. Velocity difference equations	pag.	89
3.2. Pressure evaluation	"	95
3.3. Boundary conditions	"	100
3.4. Free surface boundary conditions	"	103
3.5. Nonsteady cavity flow problems	"	108
3.6. Heat transfer and transport of solutes	"	119
3.7. Stratified flow driven by constant surface shear	"	131
3.8. Linearized models	"	138
3.9. Stability of the methods	"	142
3.10 Summary of a calculational step	"	155
4. Numerical Methods for the General Model with Volume Expansion	"	157
4.1. Velocity difference equations	"	157
4.2. Heat transfer and transport of solutes	"	163
4.3. Pressure evaluation	"	167
4.4. Free surface and boundary conditions	"	172
4.5. Fluid stratification and volume expansion	"	179
4.6. Stability considerations	"	184
4.7. Summary of a calculational step	"	193
5. Three Dimensional Numerical Methods	"	195
5.1. The general model	"	195
5.2. Pressure evaluation	"	207
5.3. Boundary conditions	"	213

5.4. Boussinesq approximation	pag. 220
5.5. Linearized models	" 231
5.6. Porous flow models	" 234
5.7. Three dimensional cavity flow	" 240
5.8. Stability considerations	" 245
5.9. Summary of a calculational step	" 257
6. Computer Codes	" 259
6.1. A code for free surface porous flow problems	" 259
6.2. A code for models with the Boussinesq approximation	" 272
6.3. A code for models with volume expansion	" 284
6.4. A three dimensional code	" 297
APPENDIX: The Successive Overrelaxation Method	" 314
REFERENCES	" 318
