

Table of Contents

<u>Session 1</u>		1
Chairman: N. Riley		
Fornberg, B.	Steady viscous flow past a cylinder and a sphere at high Reynolds numbers ...	3
LeBalleur, J.C. Girodroux-Lavigne, P.	Prediction of buffeting and calculation of unsteady boundary layer separation over airfoils	19
Bogdonoff, S.M.	Observation of three-dimensional "separation" in shock wave turbulent boundary layer interactions	37
Kiya, M.	Structure of flow in leading-edge separation bubbles	57
Van Dommelen, L.L.	Computation of unsteady separation using Lagrangian procedures	73
<u>Session 2</u>		
Chairman: J.H. Merkin		89
Sychev, V.V.	On turbulent boundary-layer separation .	91
Burggraf, O.R.	Three-dimensional supersonic separation .	*
Dovgal A.V. Kozlov, V.V. Simonov, O.A.	Experiments on hydrodynamic instability of boundary layers with separation	109
Drazin, P.G.	Separation of flow in a two-dimensional channel	*

Session 3

Chairman: T.C. Adamson	131	
Ryzhov, O.S.	The Brillouin - Villat condition in the theory of separation	133
Lock, R.C.	Velocity profiles for two dimensional turbulent separated flows	149
Edwards, D.E.	Analysis of three-dimensional separated flow using interacting boundary-layer theory	163
Simpson, R.L.	A review of two-dimensional turbulent separated flow calculation methods	179
Rothmayer, A.P.	A new interacting boundary-layer formulation for flows past bluff bodies	197

Session 4

Chairman: K. Gersten	215	
Melnik, R.E.	A new asymptotic theory of turbulent boundary layers and the turbulent Goldstein problem	217
Badr, H.M.	Vortex formation in unsteady flow near	
Dennis, S.C.R.	a moving wall	235
Ghia, K.N.	Simulation of separated flow past a bluff	
Ghia, U.	body using Navier-Stokes equations	251
Osswald, G.A.		
Liu, C.A.		
Neiland, V. Ja	Some features of the transcritical boundary layer interaction and separation	269

Session 5

Chairman: H.M. Badr

Duck, P.W.	Unsteady triple-deck flows leading to instabilities	297
Kozlov, V.V.	Interrelation of the flow separation, stability and coherent structures	*
Cebeci, T. Kaups, K. Khattab, A.A.	Separation and reattachment near the leading edge of a thin wing	313
Kuwahara, K. Shirayama, S.	Simulation of three-dimensional boundary-layer separation	*
Smith, F.T.	Separating flow: small-scale, large-scale, and nonlinear unsteady effects	331

Session 6

Chairman: A.I. Van de Vooren

347

Henkes, R.A.W.M. Veldman, A.E.P.	Breakdown of steady and unsteady interacting boundary layers	349
Fiddes, S.P. Smith, J.H.B.	Asymptotic separation from slender cones at incidence	363

<u>Poster Session</u>	(discussions chaired by Pedley, T.J.)	377
Bippes, H.	Experimental investigation of topological structures in three-dimensional separated flow	379
Chanetz, B.	Experimental investigation of three-dimensional separation on ellipsoid bodies at incidence	383
Dallmann, U. Kordulla, W. Vollmers, H.	Three-dimensional separated flow structures	387
Deriat, E. Guiraud, J.-P.	Asymptotic theory of high Reynolds number turbulent flows	391
Gittler, P. Kluwick, A.	Nonuniqueness of triple-deck solutions for axisymmetric supersonic flow with separation	395
Mikkelsen, H.E.	The dynamic interaction between dune shape, flow field and sediment motion	399
Mitra, N.K. Fiebig, M. Franz, J.	Structure of confined wakes behind a circular cylinder	403
Page, M.	Low-Rossby-number flow past a circular cylinder in a rotating frame	407
 <u>Closing of The Symposium</u>		
Sir James Lighthill	Closing remarks	409
