Preface xi

PART I. EXPERIMENTAL FLUID DYNAMICS

KEYNOTE CONTRIBUTION

Endwall Effects on Local Mass Transfer from a Cylinder in Crossflow

J. Karni and R. J. Goldstein 3

Turbulence Measurements

Turbulent Boundary Layer in Rapidly Varied Flow

Z. Dong, X. Tao, C. Song, and C. Chen 39

Experimental Investigation of Turbulent Boundary Layer and Wake of Model Ships in Wind Tunnel

M. Ikehata 49

Measurements of Spanwise Vorticity Fluctuations in a Back-Step Flow

T. Hoshino and S. Ito 59

Flow Characteristics of 2-Dimensional Sub-Breaking Waves

K. Mori and Y. Doi 69

The Universal Equilibrium Spectra of Turbulent Velocity at Large Reynolds Numbers

T. Komatsu, T. Shibata, and Y. Matsumoto 79

Atmospheric Lateral and Longitudinal Turbulent Length Scales (Measured at 600 to 800 Meters above Grade Level)

W. C. Cliff and J. R. Skarda 89

Fluctuation of Water Level and Velocity at Enlargement of Cross Section in a River

H. Hashimoto and T. Asano 99

Entrainment Due to Oscillating-Grid Turbulence in Two-Layered Fluid

M. Ura, T. Komatsu, and N. Matsunaga 109

Estimation of Nonuniformity of Two Component Gas Mixture Flow

O. Kawaguchi, A. Meguro, and G. T. Sato 119

Wake Measurements of an Oscillating Airfoil

S. O. Park and J. S. Kim 127

Visualization and Measurement of the Wakes of Two-Dimensional Bodies in the Strong Turbulence

H. Makita and K. Sassa 137

Experimental Techniques

- Fluid Flow Measurement by Thermal Pulse
H. Wolf and M. Hemeyri 149
- Velocity Measurements with a New Bi-Directional Micro-Propeller Current Meter
D. R. Basco, Ib A. Svendsen, and J. Christensen 157
- Physical Modeling of a Dual-Electrode-Pair, Joule Heated Glass Melter
J. R. Skarda and C. R. Reid 165
- Ignition and Combustion of Free Liquid Fuel Droplet in a Hot Gas Stream
O. Kawaguchi, K. Kikuchi, and Y. Kanno 177
- Vapor Budget Measurement of Evaporation from Artificially Moistened Surfaces
P. Inmula and B. L. Sill 187
- Turbulence Measurements Using Split-Film Anemometry
D. E. Stock and T. M. Jaballa 197
- The Investigation of the Skin Friction Measurements in 3D-Turbulent Boundary Layer Flows
H.-Y. Teng and T.-D. Hsing 207

Flow Visualization

- Visualization of Natural and Mixed Convection Flows in a Cavity
H. S. Rhee, J. R. Koseff, and R. L. Street 219
- An Experimental Investigation of the Mixing Layer behind Dunes with Combined Flow Visualization and Velocity Measurement
A. Mueller 229
- Flow Visualization of Coherent Structures in Turbulent Open-Channel Flow
M. Aydin and H. J. Leutheusser 239
- Visualization of Fluid Simulation
T. Sasaki, M. Mori, and A. Wada 249

PART II. COMPUTATIONAL FLUID DYNAMICS

KEYNOTE CONTRIBUTION

- Modeling the Effect of Buoyancy and Rotation on Turbulence
J. L. Lumley, D. E. Hestad, and P. Morel 261

Finite-Element Method

- Modeling Complex Two-Dimensional Flows by the Complex-Variable Boundary-Element Method
C. Lai and T. V. Hromadka 273

TRIO—A General Computer Code for Reactor 3-D Flows Analysis: Application to a LMFBR Hot Plenum

J.-P. Magnaud and Ph. Rouzaud **283**

A Finite Element Algorithm for Turbulent Flow Processing a k- ϵ Model

J. Goussebaile, A. Jacomy, A. Hauguel, and J. P. Gregoire **289**

Analysis of Transient Flow through Broken Levees

N. D. Katopodes **301**

A Depth Integrated Model for Solving Navier-Stokes Equations Using Dissipative Galerkin Scheme

S. S. Y. Wang and S. E. Adeff **311**

New Variational Principle Families for Direct-, Inverse- and Hybrid Problems of Free Surface Gravity Flow over a Spillway

G. Liu **323**

Study of Turbulent Flows through a Plane Cascade at Various Angles of Attack with Separation

C. G. Gu and Y. M. Miao **333**

Finite-Difference Method

Comparison of Several Eulerian-Lagrangian Models to Solve the Advection-Diffusion Equation

A. M. Baptista, E. E. Adams, and K. D. Stolzenbach **345**

Applications of Vorticity-Velocity Formulation for Engineering and Geophysical Flows

P. Orlandi **355**

Numerical Problems in Coupling Two- and Three-Dimensional Models: The CYTHERE 3-D System

M. I. Chenin-Mordjovich and J. M. Usseglio-Polatera **365**

Recirculation in Depth-Integrated Flow

M. B. Abbott and J. Larsen **375**

Pollutant Transport Simulation in One and Two Dimensions

T. Komatsu, N. Nakashiki, and K. Ohgushi **385**

Mathematical Model for the Calculation of Three-Dimensional Flow in Hydro-Machines by Finite Elements

S. Zhang and X. Xu **397**

Evolution of Secondary and Tertiary Vortex Formations in the Wake of an Impulsively Started Circular Cylinder: The Asymmetric Wake Case for Re = 3000

J. R. Pravia and A. Giorgini **405**

Applicability of the Two-Equation Turbulence Model to the Thermalhydraulics in a Plenum

A. Wada, H. Suzuyama, and K. Adachi 415

Finite-Analytic Method

The Stability and Convergence of FAM for Unsteady Two-Dimensional Convective Transport Equation

X. Zeng and W. Li 427

A New Numerical Method (Quasi-Analytical Method) and Its Application in Two Dimensional Unsteady Flow

E. Zhang, D. Zhang, and F. Gao 435

A Spectral Finite Analytic Technique for the Simulation of the Flow between Two Concentric Rotating Cylinders

A. Hamidi and A. Giorgini 445

PART III. EXPERIMENTAL AND COMPUTATIONAL APPLICATIONS

KEYNOTE CONTRIBUTION

Numerical Modelling of Complex Industrial and Environmental Flows

A. Hauguel 457

Jet Flow

The Flow of Round Buoyant Jets Discharging Vertically into a Cross Flow of Stratified Fluid

R. R. Hwang and T. P. Chiang 485

Global Constraints on Buoyant Jet Mixing in Confined Environments

S. J. Wright 495

The Spreading of a Gas Cloud from a Spill

L. N. Persen 505

Modeling the Mixing of a High Temperature Gas Jet in a Cold Pipe Flow

P. L. Viollet and F. Lana 515

Velocity and Temperature Fields in Turbulent Heated Air Jets Issuing from Sharp-Edged Inlet Rounded Nozzles

N. T. Obot and T. A. Trabold 527

Numerical Simulation of Plunging Reservoir Inflow

G. Farrell and H. G. Stefan 537

An Experimental Study of a Three-Dimensional Surface Thermal Plume

M. D'Andrea and R. E. Baddour 547

The Structure of Slurry Spray Flames

S. H. Wu and L.-D. Chen 557

Boundary Layers

Prediction of Turbulent Skin Friction for Two-Dimensional, Rib-Type Surface Roughness Using a Discrete Element Approach

R. P. Taylor, B. K. Hodge, and H. W. Coleman 569

On the Turbulent Prandtl-Number in Boundary Layer Flow

L. N. Persen 579

Numerical Modelling of Turbulent Flow over Dunes to Predict Flow Resistance

C. Mendoza and H. W. Shen 589

Turbulent Flow Near the Wall of a Conical Diffuser

*B. R. Satyaprakash, K. A. Nagabushana, R. S. Azad,
and S. Z. Kassab* 599

Cavity Flow

Prediction of Turbulent Flows in Rectangular Cavity with k- ϵ -A and K- ϵ -E Models

C.-J. Chen and S.-M. Chang 611

Effect of Inclined Angle in Turbulent Natural Convection Flow and Heat Transfer in a Square Enclosure

J.-H. Lee and M.-H. Park 621

A Comparison Study of a Turbulent Cavity Flow

C. Bouffinier and M. Grandotto 631

Prediction of Hydrodynamic Characteristics of Rectangular Settling Tanks

I. Celik, W. Rodi, and A. I. Stamou 641

Flow Separation

Turbulent Flow Prediction in a Sudden Axisymmetric Expansion

B. K. Sultanian, G. P. Neitzel, and D. E. Metzger 655

Numerical Modeling of Two-Dimensional Unsteady Turbulent Recirculating Flow

Y. W. Dai and Z. J. Qu 665

Unsteady Viscous Flows Round Moving Circular Cylinders and Airfoils II

Y. Lecointe and J. Piquet 675

Duct Flow

Pressure Drop, Velocity and Heat Transfer Characteristics in Smooth Scalene Triangular Ducts Having Two Rounded Corners

N. T. Obot and K. Adu-Wusu 687

Turbulent Flow in Compound Channels and Ducts

D. W. Knight and C. J. Lai 697

Boundary Shear Stress Distributions in Rectangular Duct Flow

D. W. Knight and H. S. Patel 707

Turbulent Flow in a Sinuous Air Duct
S. Ikeda, M. Tanaka, and M. Chiyoda **717**

Stratified Flow

A Time Dependent, Quasi-Three Dimensional Depth-Integrated Numerical Model to Calculate Surface Heat Transfer and Entrainment to Cold Fluid Intrusions

R. N. Meroney **729**

Variable Density Gravity Currents

J. J. Warwick and W. A. Murray **741**

Recent Developments in Interfacial Flow Dynamics

E. Partheniades and V. Dermassis **749**

Effects of Regular Interfacial Waves on Two-Layered Flow

N. Matsunaga, T. Komatsu, and T. Namikawa **761**

Steady Two-Dimensional Density Current Dynamics

J. M. Jones and G. H. Jirka **771**

Alluvial Hydraulics

Two-Dimensional Depth-Averaged Model for the Calculation of Sediment Transport and River Bed Deformation

R. N. Pavlović, S. Varga, and B. Mišić **783**

Critical Tractive Force of Nonuniform Sand Bed

S.-H. Ahn and J.-U. Ko **793**

Temporal Scour Development around a Circular Pile

M. Falcón and L. Uribe **805**

Eddy Viscosity in Channel Bends

R. Booij **813**

Transport Approximation Applied to the Development of a Scour Hole beneath a Submarine Pipeline

F. A. van Beek, W. Leeuwenstein, M. J. Officier, and H. G. Wind **823**

SPECIAL KEYNOTE CONTRIBUTION

Leonardo's Methodology in His Fluid Mechanical Investigations

E. O. Macagno **833**

Author Index **865**

Keyword Index **867**
