

CONTENTS

	Page
Preface	3
Introduction	5
1.1 The Hugoniot Curve for Shocks with Heat Release	8
1.2 Examples of Gas Flow with Detonation Waves ...	16
1.3 Asymptotic Behaviour of Decaying Detonation Waves	30
1.4 Nonuniqueness of Solutions with Infinitely Thin Heat Release Fronts	41
1.5 Models of Detonation Waves with Internal Struc- ture	47
2.1 Introduction and Formulation of the Problem ...	57
2.2 Computation of Subsonic Flow Region	60
2.3 Computation of the Supersonic Flow Region	80
2.4 Some Results of Computations	87
3.1 Instability of the Flame Front in a Two-Front Detonation Wave	104
3.2 Linear Stability Theory of Detonation Wave with Two-Front Structure	114
3.3 Development of Oscillations Associated with the Attenuation of a Detonation Wave	122
3.4 Point Explosion in Combustible Gas Mixture [39]	133
References	130
Contents	143
