Chapter 1. Velocities and Stresses in Turbulent Flows

Introduction	1
Types of Turbulent Flow	9
Pipe-Flow Turbulence	11
Prandtl's Theory	14
Shear Stress Velocity	20
Velocity Profiles	22
Dimensionless Units	26
The Interpretation of v_0	27
The Friction Factor ϕ and Pressure Drops	29
Dimensionless One-Seventh-Power Velocity Profile	38
Flow over Flat Plates	39
Entry Effects in Pipes	47
Flow in Open Channels	48

Isotropic Turbulence	49
Turbulence in Stirred Tanks	62
Free Turbulent Jets	69
Restrained Turbulent Jets	73
References	77

Chapter 2. Eddy Transfer of Mass and Heat within Fluids

Introduction to Mass Transfer in Fluids	79
Mass Transfer in Turbulent Flows	81
Mixing in Turbulent Flows	88
Introduction to Heat Transfer in Fluids	102
Heat Transfer in Turbulent Flows	107
Thermal Mixing in Turbulent Flows	118
References	120

Chapter 3. Eddy Transfer near Solid Surfaces

Eddies near a Solid Surface	121
Velocity Profiles near Wall for Turbulent Flow	131
Relation between Momentum and Mass Transfer	138
Comparison with Experiment for Smooth Surfaces	142
Mass Transfer from Rough Surfaces	144
Mass Transfer in Stirred Tanks	148
Mass Transfer into Impinging Submerged Turbulent Jets	151
Reaction between Dissolving Solid and Bulk Reactant	153
Deposition from Colloidal Dispersions	155
Relation between Momentum and Heat Transfer	157
Comparison with Experiment	161
Heat Transfer across Rough Walls	165
Heat Transfer from Suspended Solids	169
Heat Transfer in Stirred Tanks from Jacket or Coiled Pipes	170
Heat Transfer to Liquid Metals in Pipes	171
Heat Transfer into Impinging Submerged Jets	173
References	173

Chapter 4. Eddies at Clean Gas-Liquid Surfaces

Eddies near a Liquid Surface	175
Mass Transfer Calculations	186
Experiments on Surface Renewal	189
Experimental Physical Absorption Rates	191
Gas Absorption with Chemical Reaction	217
References	223

Chapter 5. Eddies at Clean Liquid–Liquid Interfaces

Eddies near a Clean Liquid–Liquid Interface	225
Visualization of Interfacial Renewal	229
Experimental Physical Absorption Rates	231
Extraction Accompanied by Chemical Reaction	245
Heat Transfer	248
References	248

Chapter 6. Eddies at Film-Covered Surfaces

Eddies near Film-Covered Surfaces	250
Experiments on Surface Renewal	258
Experimental Physical Absorption Rates	260
References	271

Chapter 7. Turbulence in Non-Newtonian Fluids and Drag Reduction

Nonelastic Non-Newtonian Fluids	273
Elastic Fluids in Shear	281
Reduction of Turbulent Drag	285
Drag Reduction by Flexible Walls	298
References	298

Chapter 8. Eddies in and around Moving Drops

Introduction	300
Velocity and Mass Transfer at Low Drop Reynolds Number	301
Velocity and Mass Transfer at Intermediate Reynolds Numbers ($Re = 50$ – 200)	309
Heat Transfer at Reynolds Numbers up to about 200	311
Drop Behavior at High Drop Reynolds Numbers (a Few Hundred to a Few Thousand)	312
Heat Transfer at High Reynolds Numbers	321
Larger Drops and Bubbles	322
Non-Newtonian Systems	323
Drops in Agitated Systems	325
References	326

Chapter 9. Spontaneous Interfacial Turbulence and Emulsification

Spontaneous Interfacial Turbulence	327
Quantitative Theories	330
Mass Transfer and Interfacial Turbulence	333

Mass and Heat Transfer at Solid Surfaces	339
Spontaneous Emulsification	343
References	346

Chapter 10. Turbulent Dispersion and Coalescence

Introduction	348
Dispersion into Isotropic Turbulence	349
Dispersion into Pipe-Flow Turbulence	352
Dispersions of Liquids and Solids in Gases	355
Dispersion of Liquids from Turbulent Jets	356
Dispersion of Gas Bubbles in Turbulent Liquids	358
Mass Transfer in Disperse Systems	358
Coalescence	360
Practical Extraction in Agitated Systems	362
References	363

Appendix I. The Equation of Continuity	364
--	-----

Appendix II. The Levich Treatment of Mass Transfer	366
--	-----

Appendix III. The Effect of Chemical Reaction on Solution Rates	369
---	-----

Appendix IV. Deposition of Aerosol Particles from Turbulent Fluids	373
--	-----

Appendix V. Heat Transfer to Liquid Metals	375
--	-----

Appendix VI. Rate of Absorption of a Gas into a Turbulent Liquid	377
--	-----

Appendix VII. Absorption of Gas with Chemical Reaction	379
--	-----

Symbols and Units

Useful Conversion Factors	381
Notation	382

Problems	389
