PREFACE	xi
---------------	----

SECTION I: SLURRY AND SUSPENSION FLOW PROPERTIES

1. Rheological Behavior of Suspensions	3
<i>H. N. Stein</i>	
2. Hydrodynamics of Slurries and Suspensions	49
<i>R. Darby</i>	
3. Accelerated and Steady Particle Flows in Newtonian Fluids ...	93
<i>Y. Zimmels</i>	
4. Critical Velocity in Multisize Particle Transport Through Pipes	155
<i>G. A. Wani</i>	
5. Fluid/Particle Mass Transport in Slurries	189
<i>B. Andersson</i>	
6. Principles of Slurry Pipeline Hydraulics	213
<i>R. W. Hanks</i>	
7. Mechanistic Models of Particulate Slurry Transport	277
<i>K. C. Wilson</i>	
8. Hydrodynamics of Fiber Suspensions	291
<i>T. J. Stenuf and J. E. Unbehend</i>	
9. Design Principles of Hydraulic Capsule Transport Systems ..	309
<i>H. G. Polderman</i>	

10. Behavior and Prevention of Hydraulic Surges in Hydrotransport Systems	331
<i>A. G. Jvarsheishvili</i>	

SECTION II: UNIT OPERATIONS OF SLURRY FLOWS

11. Effects of Surfactants on Particle Rotation and Settling Characteristics	395
<i>R. Shail and D. K. Gooden</i>	
12. Mechanisms of Liquid Phase Agglomeration for Particle Recovery and Beneficiation	455
<i>C. E. Capes and A. E. Funda</i>	
13. Principles of Flow Through Porous Media	499
<i>R. A. Greenkorn</i>	
14. Flow Past Porous Layers and Their Stability	567
<i>N. Rudraiah</i>	
15. Theoretical Approaches to Thickening and Filtration	649
<i>R. J. Wakeman</i>	
16. Industrial Sedimentation Practices	685
<i>N. P. Cheremisinoff</i>	
17. Industrial Filtration Equipment	717
<i>N. P. Cheremisinoff</i>	
18. Principles of Constant-Pressure Filtration	791
<i>D. E. Smiles</i>	
19. Drag-Stress/Pressure-Drop Relationships in Filtration	825
<i>I. Tosun</i>	
20. The Interpretation of Nonparabolic Filtration Data	839
<i>M. S. Willis</i>	
21. Principles of Compressible Cake Filtration	865
<i>W. Leu</i>	

22. Principles of Expression and Design of Membrane Compression-Type Filter Press Operation	905
<i>M. Shirato, T. Murase, M. Iwata, and T. Kurita</i>	
23. Filtration in Non-Newtonian Media	965
<i>W. Kozicki</i>	
24. Membrane Transport Phenomena and Ultrafiltration	987
<i>S. I. Nakao</i>	
25. Reverse Osmosis and Ultrafiltration	1029
<i>S. Sourirajan and T. Matsura</i>	
26. Free Particle Washing	1149
<i>T. Toda</i>	
27. Dewatering Fine Particle Waste Suspensions with Direct Current	1171
<i>D. J. Kelsh and R. H. Sprute</i>	
28. Kinetics of Centrifugation and Hydrocyclones	1191
<i>E. A. Nepomnyashchii</i>	
29. Industrial Centrifuging Practices	1231
<i>N. P. Cheremisinoff</i>	
30. Design and Scale-Up of Disc-Stack Centrifuges	1247
<i>S. K. Gupta and A. Kumar</i>	
31. Unit Operations of Wastewater Treatment Plants	1267
<i>P. N. Cheremisinoff and N. P. Cheremisinoff</i>	
32. Computer Model for Design of a Wastewater Treatment Plant	1369
<i>R. Fortunato, R. Trattner, and P. N. Cheremisinoff</i>	
33. Separation, Concentration, Purification, and Products Recovery Techniques in Biotechnology	1429
<i>R. P. Ouellette</i>	
INDEX	1465
