PREFACE	xi
----------------------	-----------

SECTION I: DEVELOPMENTS IN HYDRODYNAMICS

1. Prediction of Holdup in Two-Phase Gas-Liquid Downward Inclined Flow	1
<i>P. L. Spedding, N. P. Hand, and M. E. G. Ferguson</i>	
2. Prediction of Holdup and Frictional Pressure Loss in Two-Phase Co-Current Flow	17
<i>P. L. Spedding and N. P. Hand</i>	
3. The Effect of Pipe Diameter on Prediction of Holdup	31
<i>P. L. Spedding, N. P. Hand, and M. E. G. Ferguson</i>	
4. Fully Developed Two-Phase (Air-Solids) Flow in a Vertical Pipe.....	51
<i>J. Fan, J. Jin, and K. Cen</i>	
5. Hydraulic Characteristics of a Bayonet Tube Under Turbulent Conditions	63
<i>G. S. H. Lock and M. Wu</i>	
6. Solutions for the Problem of a Developing Free Convection Flow Over a Flat Vertical Surface	79
<i>T. W. Abou-Arab, T. K. Aldoss, and K. Ramadan</i>	
7. Effect of Magnetic Field on Free Convection in a Rectangular Cavity	95
<i>R. M. Barron and V. Jawali</i>	
8. Explicit Equations for Friction Factor—Reynolds Number Relation in Turbulent Flow of Power Law Fluids Through Smooth and Rough Circular and Noncircular Pipes	107
<i>A. V. Shenoy</i>	
9. Flow of a Casson Fluid in the Entrance Region of a Porous Tube	123
<i>B. Das and R. L. Batra</i>	

10. Prediction of Transitional Boundary Layer Over Smooth and Rough Surfaces 139
B. A. Jubran, M. A. Hamdan, and A. S. Awwad

SECTION II: DEVELOPMENTS IN HEAT TRANSFER

11. Unsteady Flow Past a Naturally Permeable Bed 163
K. N. Mehta
12. Heat and Momentum Transfer in a Buoyant Swirling Jet 171
H. S. Takhar, R. S. R. Gorla, and M. A. Halim
13. Heat Transfer in a Laminar Curved Wall Jet with Variable Normal Magnetic Field 193
R. S. R. Gorla and R. Seela
14. Heat Transfer to Generalized Non-Newtonian Couette Flow in Concentric Annuli with a Moving Outer Cylinder... 209
S. H. Lin
15. Mixed Convection from a Rotating Cone to Micropolar Fluids 227
R. S. R. Gorla and S. Nakamura
16. Hall Effects on Oscillatory MHD Free Convective Flow Through a Porous Medium..... 251
H. S. Takhar, N. Yadav, and P. C. Ram
17. Navier-Stokes Analysis of Heat Transfer Over a Flat Plate..... 259
R. S. R. Gorla and A. Ameri
18. Boundary Layer Flow of Micropolar Fluid on Rotating Axisymmetric Surfaces with a Concentrated Heat Source 271
R. S. R. Gorla and H. S. Takhar
19. Effects of Radial Temperature Gradient on the Stability of MHD Couette Flow Between Nonconducting Walls: Wide Gap Problem 283
H. S. Takhar, V. M. Soundalgekar, and M. A. Ali
20. Single Solution to a Rewetting Model with Precursory Cooling in Both Slab and Rod Geometries 305
F. Castiglia, E. Oliveri, S. Taibi, and G. Vella
21. Unsteady Heat Transfer Due to Time-Dependent Free Stream Velocity 317
R. S. R. Gorla and A. Ameri

22. Radiative Effect on Conjugate Forced Convection in a Laminar Wall Jet Along a Flat Plate	333
<i>R. S. R. Gorla</i>	
INDEX	343
COMPREHENSIVE INDEX (VOLUMES 1 – 10 and Supplements 1 and 2)	346
