

# Contents

**Tables** *xi*

**Preface** *xiii*

**To the Student** *xvii*

---

**1 Introduction** *1*

- 1.1 The World of Fluid Mechanics *1*
  - 1.2 The Physics of Fluids *10*
  - 1.3 Dimensions and Units of Measurement *24*
  - 1.4 Vector Algebra and Calculus *29*
  - 1.5 Problems *36*
- Bibliography *38*

**2 Fluid Statics** *39*

- 2.1 Forces on a Fluid Particle *39*
- 2.2 Stress in a Fluid *40*
- 2.3 Pressure in a Static Fluid *41*
- 2.4 Pressure Forces on Solid Surfaces *52*
- 2.5 Pressure Forces on Bodies Immersed in Fluids *60*
- 2.6 Stratified Fluids *68*
- 2.7 Surface Tension and Capillarity *75*

2.8	Hydraulic Force Transmission	77
2.9	Problems	79
	Bibliography	88
<b>3</b>	<b>Conservation of Mass</b>	89
3.1	Kinematics of Fluid Flow	89
3.2	Control Volumes and Surfaces	97
3.3	Conservation of Mass	100
3.4	Conservation of Chemical Species	107
3.5	Two-Phase Flow	110
3.6	Measuring Volume and Volume Flow Rate	111
3.7	Problems	111
	Bibliography	125
<b>4</b>	<b>Inviscid Flow</b>	127
4.1	Criterion for Inviscid Flow	127
4.2	Acceleration of a Fluid Particle	128
4.3	Euler's Equation	130
4.4	Bernoulli's Equation	133
4.5	Euler's Equation in Streamline Coordinates	150
4.6	Inviscid Flow in Noninertial Reference Frames	152
4.7	Special Flows	160
4.8	Problems	163
	Bibliography	184
<b>5</b>	<b>Conservation of Momentum</b>	185
5.1	Introduction	185
5.2	Reynolds' Transport Theorem	186
5.3	Linear Momentum	189
5.4	Applications of the Linear Momentum Theorem	197
5.5	Angular Momentum	219
5.6	Applications of the Angular Momentum Theorem	225

5.7	Problems	232
	Bibliography	263
<b>6</b>	<b>Laminar Viscous Flow</b>	<b>265</b>
6.1	Introduction	265
6.2	The Viscous Stress	266
6.3	The Viscous Force	269
6.4	The Navier-Stokes Equation of Motion	271
6.5	Applications of the Navier-Stokes Equation	275
6.6	Laminar Boundary Layers	311
6.7	Problems	324
	Bibliography	352
<b>7</b>	<b>Turbulent Viscous Flow</b>	<b>353</b>
7.1	Introduction	353
7.2	Characteristics of Turbulent Flow	353
7.3	Turbulent Skin Friction and Drag	361
7.4	Simple Models of Turbulent Mean Flow	368
7.5	Problems	374
	Bibliography	376
<b>8</b>	<b>Conservation of Energy</b>	<b>377</b>
8.1	Introduction	377
8.2	Incompressible Viscous Flow	378
8.3	The First Law of Thermodynamics	386
8.4	The Second Law of Thermodynamics	394
8.5	Derivation of the Differential Form of the First Law	397
8.6	Problems	399
	Bibliography	400
<b>9</b>	<b>Flow in Fluid Systems</b>	<b>401</b>
9.1	Introduction	401
9.2	Head Loss in Pipes and Ducts	402

9.3	Head Changes in Systems with Pumps and Turbines	415
9.4	Complex Networks	420
9.5	Problems	428
	Bibliography	439
<b>10</b>	<b>Dimensional Analysis and Modeling</b>	<b>441</b>
10.1	Introduction	441
10.2	Dimensional Analysis	442
10.3	Modeling	456
10.4	Drag	473
10.5	Lift	478
10.6	Problems	482
	Bibliography	493
<b>11</b>	<b>Irrational Flow</b>	<b>495</b>
11.1	Introduction	495
11.2	Vorticity	496
11.3	The Stream Function for Incompressible Flow	502
11.4	Plane Irrational Flows	506
11.5	Axisymmetric Irrational Flows	532
11.6	Flow over Airfoils and Wings	540
11.7	Numerical Solutions	544
11.8	Potential Flow	547
11.9	Problems	548
	Bibliography	551
<b>12</b>	<b>Compressible Flow</b>	<b>553</b>
12.1	Introduction	553
12.2	The Speed of Sound	555
12.3	Steady Isentropic Flow	560
12.4	Shock Waves	570
12.5	Adiabatic Viscous Pipe Flow	577

12.6 Plane Supersonic Flow	580
12.7 One-Dimensional Unsteady Flow	590
12.8 Problems	596
Bibliography	598
