

CONTENTS

III APPLICATIONS OF FLUID DYNAMICS

23	Fluid Dynamic Related Technologies	1591
23.1	Lubrication	1594
23.2	Acoustics	1616
23.3	Fluid Dynamics of Combustion	1636
23.4	Fluid Dynamics in Materials Processing	1653
23.5	Lifting Surfaces	1673
23.6	Aeroelasticity and Hydroelasticity	1684
23.7	Road Vehicle Aerodynamics	1707
23.8	Aerodynamics of Trains	1721
23.9	Lighter-than-Air Vehicles	1741
23.10	Laminar Flow Control on Aircraft	1755
23.11	Cavitation	1769
23.12	Ship Hydrodynamics	1788
23.13	Dynamics of Partially Filled Tanks	1793
23.14	Aero- and Hydro-Optics	1803
	References	1828
24	Fluid Dynamics in Nature	1847
24.1	Atmospheric Flows	1849
24.2	Flow over Buildings—Wind Engineering	1869
24.3	Ocean Flows	1884
24.4	Sedimentation	1892
24.5	River Flows	1905
24.6	Fluid Mechanics in Plant Biology	1921
24.7	Animal Fluid Dynamics	1938
24.8	Animal and Ornithopter Flight	1951
24.9	Oil Spreading on the Sea	1968
24.10	Bubblers for Ice Melting	1970
	References	1974
25	Static Components of Fluid Machinery	1991
25.1	Duct Flows	1993
25.2	Diffusers	2024
25.3	Hydraulics of Valves	2043
25.4	Ejectors	2064
25.5	Seals	2077

25.6	Nozzles	2093
25.7	Rocket Propulsion Systems	2116
25.8	Air Intakes and Diffusers for Aircraft Engines	2137
25.9	Nacelles and Exhaust Systems for Aircraft Engines	2145
25.10	Ramjets	2162
	References	2180
26	Positive Displacement Compressors, Pumps, and Motors	2187
26.1	Introduction	2187
26.2	Positive Displacement Compressor Types	2189
26.3	Positive Displacement Compressor Performance	2193
26.4	Positive Displacement Pump Types	2201
26.5	Positive Displacement Pump Performance	2204
26.6	Pulsating Flow for Positive Displacement Machines	2213
26.7	Positive Displacement Machines as Prime Movers	2215
	References	2216
27	Turbomachinery	2219
27.1	Introduction to Turbomachinery	2222
27.2	Ship and Aircraft Propellers	2242
27.3	Helicopter Rotors	2257
27.4	Axial Flow Compressors	2288
27.5	Centrifugal and Mixed-Flow Compressors	2317
27.6	Low Pressure Fans	2340
27.7	Centrifugal Pumps	2356
27.8	Stability in Pumps and Compressors	2371
27.9	Hydraulic Turbines	2397
27.10	Steam Turbines	2422
27.11	Gas Turbines	2462
27.12	Fluid Couplings and Torque Converters	2536
27.13	Wind Turbines	2549
	References	2567
28	Hydraulic Systems	2577
28.1	Hydraulic Fluids	2577
28.2	Contamination Control	2579
28.3	Positive Aspects of Contamination	2580
28.4	Design Equations—Orifices and Valves	2581
28.5	Design Equations—Pipes and Fittings	2584
28.6	Hydrostatic Pumps and Motors	2586
28.7	Stiffness in Hydraulic Systems	2593
28.8	System Classifications	2597
28.9	Pump Sets and Accumulators	2598
28.10	Hydrostatic Drives	2602

28.11	Concepts of Feedback Control in Hydraulics	2603
28.12	Improved Model	2607
28.13	Electrohydraulic Systems—Analog	2608
28.14	Electrohydraulic Systems—Digital	2614
	References	2616

29	Pneumatic Systems	2619
-----------	--------------------------	-------------

29.1	Purposes of Compressed Air Systems	2619
29.2	Compressor Capacity Required	2620
29.3	Centralized vs. Decentralized Systems	2622
29.4	Special Requirements	2622
29.5	Distribution Pipe Size	2622
29.6	Aftercoolers and Separators	2628
	References	2628
