

# CONTENTS

## Volume I

<b>Preface</b> .....	ix
<b>Contributors</b> .....	xiii
<b>TRANSITION</b>	
Research Status/Requirements and NASA Applications for Wall Layer Transition <i>Dennis M. Bushnell</i> .....	3
Nonlinear Interactions Between Oblique Instability Waves on Nearly Parallel Shear Flows <i>M. E. Goldstein</i> .....	13
<b>GROUP SUMMARY: Experiments</b>	
<i>Stephen P. Wilkinson</i> .....	41
Cross-Flow Instability with Periodic Distributed Roughness <i>Thomas C. Corke and Keith F. Knasiak</i> .....	43
Instabilities Introduced by a Point Source on a Conical Body at Mach 6: Stability Analysis and Experimental Implementation <i>J. T. Lachowicz, D. Cavalieri, and T. C. Corke</i> .....	63
<b>GROUP SUMMARY: Stability Theory and Applications</b>	
<i>Mujeeb R. Malik</i> .....	79
The Stability of Flow Along a Streamwise Corner <i>S. Balachandar</i> .....	81
Structure of the Stagnation Point Flow in the Presence of Cross-Stream Vorticity in the External Flow <i>M. R. Dhanak and J. T. Stuart</i> .....	95

On the Stability of a Curved Mixing Layer <i>F. Q. Hu, S. R. Otto, and T. L. Jackson</i> .....	107
Secondary Instability of Görtler Vortices <i>F. Li and M. R. Malik</i> .....	117
A Generalized Method for the Stability of Incompressible Attachment-Line Flow <i>R.-S. Lin and M. R. Malik</i> .....	127
Effect of Crossflow on Görtler Instability <i>Y. H. Zurigat and M. R. Malik</i> .....	137
<b>GROUP SUMMARY: Advanced Asymptotics</b> <i>Philip Hall</i> .....	149
The Stability of Forced-Convection Flow Over Horizontal Heated Surfaces and the Effect of Crossflow <i>Nicholas D. Blackaby and Meelan Choudhari</i> .....	151
Modulated Rolls in Rotating Channel Flow <i>Thomas J. Bridges and Alison J. Cooper</i> .....	165
On the Instability of Two-Phase Stagnation Point Flow <i>Adrian V. Coward and Philip Hall</i> .....	181
The Forcing Mechanism for Vortex/Rayleigh-Wave Interactions in Heated Boundary Layers <i>Andrew H. Dando</i> .....	191
A Finite Element Method for the Study of Linear Stability <i>1st Lt John Nelson</i> .....	201
Concerning the Effect of Crossflow on the Stability of Görtler Vortices <i>S. R. Otto and James P. Denier</i> .....	215
Breakup of Cylindrical Jets Governed by the Navier-Stokes Equations <i>Demetrios T. Papageorgiou</i> .....	225

An Asymptotic Investigation of Modes of Instability of the Compressible Boundary Layer Over a Swept Wing <i>D. N. Riahi and M. P. Vonderwell</i> .....	235
Stability of Hypersonic Flow Over a Cone <i>Sharon O. Seddougui</i> .....	245
<b>GROUP SUMMARY: Receptivity</b> <i>Michèle G. Macaraeg</i> .....	257
Leading-Edge Receptivity of Acoustic Disturbances <i>David A. Fuciarelli and Helen L. Reed</i> .....	259
Numerical Simulation of Particle Effects on Boundary Layer Flow <i>E. M. Saiki and S. Biringen</i> .....	267
<b>GROUP SUMMARY: Simulations I</b> <i>Craig L. Streett</i> .....	279
A Note on Measures of Disturbance Size for Spatially Evolving Flows <i>Dan S. Henningson and Peter J. Schmid</i> .....	281
Spatial Evolution of Disturbances in Plane Poiseuille Flow <i>Peter J. Schmid, Anders Lundbladh, and Dan S. Henningson</i> .....	287
Numerical Simulation of a Boundary Layer on a Flat Plate with a Row of Suction Holes <i>Hubert L. Meitz and Hermann F. Fasel</i> .....	299
Threshold Amplitudes for Transition in Channell Flows <i>Anders Lundbladh, Dan S. Henningson, Satish C. Reddy</i> .....	309
Vortex Identification and Analysis in Complex Flows <i>Bart A. Singer and David C. Banks</i> .....	319

On the Secondary Stability of Swept Wing Flows <i>S. R. Otto and Craig L. Streett</i> .....	329
<b>GROUP SUMMARY: Simulations II</b>	
<i>Gordon Erlebacher</i> .....	341
Structure Function Dynamic Subgrid-Scale Model <i>Nabil M. El-Hady</i> .....	343
Boundary-Layer Transition Control by Localized Heating: DNS and Experiment <i>Linda D. Kral, Richard W. Wlezien, Janice M. Smith, and Jamal A. Masad</i> .....	355
Large-Eddy Simulation of Boundary Layer Transition on Swept Wings <i>Xiaoli Huai, Ronald D. Joslin, and Ugo Piomelli</i> .....	369
Transitional High-Speed Flow on a Cone: PSE Versus DNS <i>C. David Pruett and Chau-Lyan Chang</i> .....	379
<b>CONTENTS Volume II</b>	391
