

CONTENTS

- 1 SOME FUNDAMENTAL CONCEPTS OF FLUID MECHANICS 1**
One-dimensional Flow Considerations—Continuity Equation (Conservation of Mass)—Momentum Equation (Conservation of Momentum)—Summary of Thermodynamic Principles and Equations—Energy Equation—Entropy
- 2 ONE-DIMENSIONAL ADIABATIC STEADY FLOW OF A COMPRESSIBLE FLUID 4**
The Speed of Sound—Total Head Conditions—Different Forms of the Energy Equation (Reference Speeds)—Pressure Coefficient—Steady Isentropic Flow through a Variable Area Duct—Convergent Nozzle—Convergent-divergent Nozzle—Summary of Equations (with graphs)—Worked Examples
- 3 PRANDTL-MEYER FLOW 20**
Mach Lines and some Linearised Relations in Two-dimensional Flow—Concept of Prandtl-Meyer Compression and Expansion Processes—Prandtl-Meyer Flow Analysis—Summary of Equations (with graphs)—Worked Examples.
- 4 THE PLANE NORMAL SHOCK WAVE 30**
Concept and Analysis—Summary of Equations (with graphs)—Worked Examples.
- 5 FANNO FLOW 39**
Concept and Analysis of Adiabatic Flow in a Constant Area Duct with Friction—Fanno Line—Summary of Equations (with graphs)—Worked Examples.

6 RAYLEIGH FLOW 47

Concept and Analysis of Frictionless Flow in a Constant Area Duct with Heat Energy Transfer—Rayleigh Line—Summary of Equations (with graphs)—Graphical Presentation of One-dimensional Steady Flow Processes for Air ($\gamma = 7/5$)—Worked Examples.

7 THE PLANE OBLIQUE SHOCK WAVE 57

Analysis—Busemann Shock Polar Diagram—Computation of Plane Oblique Shock Wave Data—Summary of Equations (with graphs)—Worked Examples.

8 GAS DYNAMICS—WAVE PROPAGATION IN A COMPRESSIBLE FLUID WITHOUT FRICTION IN A CONSTANT AREA DUCT 74

Propagation Velocity and Particle Velocity—Analysis of a Non-steep Finite Amplitude Wave—Acoustic Wave Equations—Analysis of a Steep-fronted Compression (Shock) Wave—Summary of Equations (with graphs)—Worked Examples.

TABLES FOR THE COMPRESSIBLE FLOW OF AIR ($\gamma = 1.4$, $R = 0.2871$ kJ/kg K)

88

- Table 1 Steady Isentropic Flow of Air with Prandtl-Meyer Data
- Table 2 Steady Adiabatic Flow of Air through a Plane Normal Shock Wave
- Table 3 Steady Adiabatic Flow of Air in a Constant Area Duct with Friction—Fanno Flow
- Table 4 Steady Frictionless Flow of Air in a Constant Area Duct with Heat Energy Transfer—Rayleigh Flow
- Table 5 Steady Adiabatic Flow of Air through a Plane Oblique Shock Wave
- Table 6 Propagation of a Non-steep Wave in Air without Friction in a Constant Area Duct
- Table 7 Propagation of a Steep-fronted Compression (Shock) Wave without Friction in a Constant Area Duct
