PART ONE

THEORY OF SINGULAR PERTURBATIONS WITH APPLICATIONS TO THE ASYMPTOTIC THEORY OF THE NAVIER-STOKES EQUATIONS

edited by P. A. LAGERSTROM and L. N. HOWARD

INTRODUCTION TO PART I 1

CHAPTER I

The Role of Coordinate Systems in Boundary-Layer Theory,
Reprint from *Journal of Applied Mathematics and Physics*,
Vol. V, pp. 111-135, 1954.

§ 1. Introduction	18
§ 2. Boundary-Layer Approximations as Limits of Exact Solutions	20
§ 3. Comparison of Different Boundary- Layer Solutions	25
§ 4. Comparison with Exact Solution. Choice of Optimal Coordinates	29
§ 5. Examples	33
§ 6. Discussion	38

CHAPTER II

Asymptotic Expansions of Navier-Stokes Solutions for Small
Reynolds Numbers, Reprint from *Journal of Mathematics and
Mechanics*, Vol. 6, No. 5, September, 1957, pp. 585-593.

§ 1. Introduction	43
§ 2. Outer and Inner Limits and Expansions	44
§ 3. Intermediate Limits	45
§ 4. Matching. Intermediate Expansions	47
§ 5. Application to Flow Past a Sphere	48
§ 6. Composite Expansion	50

§ 7. Drag	50
§ 8. Explicit Expression for h_1 for the Sphere	51
CHAPTER III	
Low Reynolds Number Flow Past a Circular Cylinder, Reprint from <i>Journal of Mathematics and Mechanics</i> , Vol. 6, No. 5, September 1957, pp. 595-603.	
§ 1. Result	52
§ 2. Derivation of u_0	54
§ 3. Derivation of g_1 and u_1	54
§ 4. Composite Expansion. Lamb's Solution	55
§ 5. Influence of Non-Linear Terms: u_2 and g_2	56
§ 6. Cylinder of Arbitrary Cross-Section	57
§ 7. Numerical Aspects	59
EDITORS' NOTES TO CHAPTERS II AND III	61
CHAPTER IV	
Basic Concepts in the Theory of Singular Perturbations and Their Applications to Flow at Small Reynolds Numbers.	
§ 1. Limits and Expansions	64
§ 2. Matching Conditions	97
EDITORS' NOTES TO CHAPTER IV	101
CHAPTER V	
Low Reynolds Number Flow: Two-Dimensional Lifting Case.	
§ 1. Characteristic Solution; Characteristic Directions; Equivalent Diameter	105
§ 2. Lift Perturbation	108
EDITORS' NOTES TO CHAPTER V	111
CHAPTER VI	
Further Remarks on Orders.	
§ 1. The Function Space \mathcal{F} and Its Quotient Spaces	112

CONTENTS	xi
----------	----

§ 2. Uniform Approximation. Sets of \mathcal{F} Validity	117
§ 3. Topological Structure of	124

EDITORS' NOTES TO CHAPTER VI	133
------------------------------	-----

PART TWO

SEPARATION IN LAMINAR BOUNDARY LAYERS

edited by P. A. LAGERSTROM and CHING-SHI LIU

INTRODUCTION TO PART II	145
-------------------------	-----

CHAPTER I

A Generalization of Poiseuille and Couette Flows

§ 1. Preliminaries	150
§ 2. The Expansion for Small ϵ	160
§ 3. The Expansion for ϵ Fixed	180

EDITORS' NOTES TO CHAPTER I	198
-----------------------------	-----

CHAPTER II

On Nature of Solutions of the Boundary-Layer Equations Near Zeroes of u

§ 1. Preliminaries	200
§ 2. Simple Zero	204
§ 3. Double Zero	225

EDITORS' NOTES TO CHAPTER II	252
------------------------------	-----

CHAPTER III

Compatibility Conditions for the Boundary-Layer Equations at a Point of Zero Skin Friction

§ 1. Intuitive Background	254
§ 2. The Past-Like Solution and Its Principal Asymptotic Expansions	272
§ 3. A Class of Compatible Profiles	304

EDITORS' NOTES TO CHAPTER III	364
-------------------------------	-----

BIBLIOGRAPHY	366
