<i>Preface to the first edition</i>	xi
<i>Preface to the second edition</i>	xv
<i>Notes for reference</i>	xvi
1 Free vibrations	1
1.1 Harmonic motion	2
1.2 Alternative mathematics for harmonic motion	10
Problems	14
2 Free vibrations in physics	15
2.1 Angular vibrations	15
2.2 Acoustic vibrations	18
2.3 Plasma vibrations	21
2.4 Molecular vibrations	24
2.5 Circuit oscillations	29
Problems	32
3 Damping	34
3.1 Light damping	35
3.2 Heavy damping	39
3.3 Critical damping	41
Problems	43
4 Damping in physics	44
4.1 Resistance damping	44
4.2 Electromagnetic damping	45
4.3 Collision damping	49
4.4 Friction damping	52
Problems	54

5	Forced vibrations	55
5.1	Steady states	56
5.2	Superposition	68
5.3	Transients	73
	Problems	75
6	Forced vibrations in physics	78
6.1	Resonant circuits	78
6.2	Scattering of light	81
6.3	Dielectric susceptibility	84
6.4	Absorption of microwaves by water	86
	Problems	92
7	Anharmonic vibrations	93
7.1	A symmetric return force	93
7.2	An asymmetric return force	99
7.3	Forced vibrations of non-linear systems	104
	Problems	107
8	Two-coordinate vibrations	110
8.1	Modes and mode coordinates	110
8.2	Forced vibrations	121
8.3	How to find the mode coordinates	126
8.4	Coupled circuits	133
	Problems	136
9	Non-dispersive waves	139
9.1	Travelling waves	141
9.2	Reflection of travelling waves	146
9.3	Standing waves	154
9.4	Energy propagation	159
9.5	Attenuation	163
	Problems	168
10	Non-dispersive waves in physics	171
10.1	Longitudinal waves	171
10.2	Acoustic waves	174
10.3	Cable waves	180
	Problems	188
11	Fourier theory	189
11.1	Harmonic analysis	189
11.2	Modulation	199
11.3	Pulses and wave groups	202
	Problems	208

	<i>Contents</i>	ix
12 Dispersion		210
12.1 Stiff strings		210
12.2 Lumpy strings		218
12.3 Evanescent waves		224
Problems		231
13 Water waves		233
13.1 The nature of the wave motion		233
13.2 The dispersion relation		246
13.3 Examples of water waves		249
Problems		253
14 Electromagnetic waves		255
14.1 Electromagnetic waves in a vacuum		256
14.2 Electromagnetic waves in a dielectric		262
14.3 Electromagnetic waves in a plasma		267
Problems		273
15 De Broglie waves		275
15.1 Wave functions		276
15.2 Physical implications		279
Problems		283
16 Solitary waves		284
16.1 Non-linear wave systems		284
16.2 Non-linear dispersion		290
Problems		294
17 Plane waves at boundaries		296
17.1 Reflection and refraction		296
17.2 Standing waves in an enclosure		305
Problems		315
18 Diffraction		317
18.1 Features due to the arrangement of the diffraction centres		318
18.2 Features due to the nature of the diffraction centres		327
Problems		336
<i>Answers to problems, and hints for solution</i>		340
<i>Constants and units</i>		348
<i>Index</i>		349
