

INDEX

	Pag.
0. Introduction	1
1. Euler equations	4
2. Vortex model	12
3. An existence theorem for Euler equations	33
4. Further considerations on vortex model	53
5. A mean field limit	67
6. Navier-Stokes equations.....	80
7. Diffusion process and Navier-Stokes equations	87
8. Mean field limit and propagation of chaos for Navier-Stokes equations	99
9. The problem of boundary conditions, Chorin method and concluding remarks	116
References	131
