	Preface	<i>page</i> xi
<b>1</b>	<b>Nonlinear Physical Systems</b>	<b>1</b>
1.1	Introduction	1
1.2	Examples of Nonlinear Physical Systems	2
1.3	Dimensionless Form of Differential Equations	15
1.4	Exact Solution for Period of a Pendulum	20
1.5	Exact Solution of $d^2y/dt^2 + y + \epsilon y^3 = 0$	23
	Problems	27
	References	30
<b>2</b>	<b>The Perturbation Method</b>	<b>32</b>
2.1	Introduction	32
2.2	Secular Terms	34
2.3	Lindstedt-Poincaré Method	36
2.4	Worked Examples	38
2.5	Shohat Expansion	45
2.6	Existence of a Periodic Solution	47
	Problems	52
	References	53
<b>3</b>	<b>Method of Slowly Varying Amplitude and Phase</b>	<b>55</b>
3.1	Introduction	55
3.2	First Approximation of Krylov and Bogoliubov	56
3.3	Worked Examples Using the Method of Krylov and Bogoliubov	61
3.4	Method of Krylov-Bogoliubov-Mitropolsky	68
3.5	Worked Examples Using the Method of Krylov-Bogoliubov-Mitropolsky	75
3.6	Stationary Amplitudes and Their Stability	79
3.7	Equivalent Linearization	84
		vii

3.8	Nonlinear Oscillations with Finite Damping	88
	Problems	93
	References	95
<b>4</b>	<b>Multi-Time Expansions</b>	96
4.1	Introduction	96
4.2	Two-Time Expansion	98
4.3	Worked Examples Using the Two-Time Expansion	101
4.4	Derivative Expansion Procedure	111
4.5	Worked Examples Using the Derivative Expansion Procedure	112
	Problems	116
	References	117
<b>5</b>	<b>Forced Oscillations</b>	118
5.1	Introduction	118
5.2	Forced Oscillations of Linear Systems	120
5.3	Combination Tones	124
5.4	Subharmonic Oscillations	126
5.5	Iteration Methods for Harmonic Oscillations without Damping	129
5.6	Perturbation Theory Applied to Forced Oscillations	132
5.7	Worked Examples Using the Perturbation Method	135
5.8	Duffing Equation: Resonance Curves and Jump Phenomena	145
	Problems	153
	References	154
<b>6</b>	<b>Advantages and Disadvantages of Various Techniques</b>	156
6.1	Introduction	156
6.2	Perturbation Method	156
6.3	Method of Slowly Varying Amplitude and Phase	157
6.4	Multi-Time Expansion	157
6.5	Procedures for Solving Nonlinear Problems	158
	<b>Appendix A: Mathematical Relations</b>	159
A.1	Trigonometric Functions	159
A.2	Factors and Expansions	161
A.3	Solution of Quadratic Equations	161
A.4	Solution of Cubic Equations	162
A.5	Differentiation of a Definite Integral with Respect to a Parameter	163
	References	163
	<b>Appendix B: Series Expansions</b>	164
B.1	Uniform Convergence	164
B.2	Weierstrass M Test for Uniform Convergence	165
B.3	Properties of Uniformly Convergent Series	165
B.4	Power Series	166

B.5	Taylor Series of a Function of a Single Variable	167
B.6	Taylor Series of a Function of Two Variables	169
	References	169
	<b>Appendix C: Fourier Series</b>	170
C.1	Definition of Fourier Series	170
C.2	Convergence of Fourier Series	173
C.3	Expansion of $F(A \cos x, -A \sin x)$ in a Fourier Series	174
	References	175
	<b>Appendix D: Asymptotic Expansions</b>	
D.1	Gauge Functions and Order Symbols	176
D.2	Asymptotic Expansions	178
D.3	Uniform Expansion	179
D.4	Elementary Operations on Asymptotic Expansions	179
D.5	Examples	181
	References	182
	<b>Appendix E: Basic Theorems of the Theory of Second-Order Differential Equations</b>	183
E.1	Introduction	183
E.2	Existence and Uniqueness of the Solution	184
E.3	Dependence of the Solution on Initial Conditions	184
E.4	Dependence of the Solution on a Parameter	185
	References	187
	<b>Appendix F: Linear Second-Order Differential Equations</b>	188
F.1	Basic Existence Theorem	188
F.2	Homogeneous Linear Differential Equations	188
F.3	Nonhomogeneous Linear Differential Equations	190
F.4	Linear Second-Order Homogeneous Differential Equations with Constant Coefficients	192
F.5	Linear Second-Order Nonhomogeneous Differential Equations with Constant Coefficients	193
	References	195
	<b>Appendix G: Existence of Periodic Solutions of Certain Second-Order Differential Equations</b>	196
G.1	Limit Cycles	196
G.2	Liénard-Levinson-Smith Theorem	198
G.3	Levinson-Smith Theorem	198
G.4	Cartwright-Littlewood Theorem	199
G.5	Levinson Theorem	199
	References	200
	<b>Appendix H: Stability of Limit Cycles</b>	201
H.1	Introduction	201
H.2	Stability Condition	202
	References	208

## *Contents*

x

<b>Appendix I: Numerical Examples</b>	<b>209</b>
I.1 Introduction	209
I.2 Simple Pendulum	209
I.3 Nonlinear Spring	213
I.4 Rayleigh Equation	215
Bibliography	218
Index	221
