List of Publications by J. Zierep	XVII
List of Contributors	XXIII

Part I Compressible Flow

Chapter 1 Transonic Flow

Heuristic Observations Related to the Computation of Transonic Flow Fields By K.G. Guderley	3
Physikalische Deutung der Verträglichkeitsbedingungen. Von K. Oswatitsch	22
A Necessary Condition to the Transonic Controversy. By D. Behbahani	29
Spezielle Lösungen der nichtlinearen, schallnahen Potentialgleichung mit Viskositätsterm. Von K. Burg	34
Untersuchung der Nachexpansion hinter einem senkrechten Verdichtungsstoß an der gekrümmten Wand. Von R. Bohning	39
A Self-Consistent Formulation of the Transonic Small-Disturbance Theory By W. Schmidt	48
Das Störpotential für instationäre schallnahe Strömungen. Von S. Turbatu	58
Shock Waves Around Bodies Travelling at Slightly Greater Than Sonic Speed By A. Rizzi	67
Density Distribution in a Non-Stationary Bow Wave in a Transonic Flow By G. Patz	76
Non-Asymptotic Shock-Detachment Distance of Slender Cones in Transonic Flow By E. Leiter and S. Tsangaris	85
Ein potentialtheoretisches Modell für Ablösegebiete hinter Stoßwellen Von D. Rues	95
Die Wirbelsenkenströmung eines kompressiblen Mediums Von W. Fränk und G.-A. Euteneuer	107

Chapter 2 Supersonic Flow

Range of Validity of the Formulae Derived by Linear Aerodynamic Theory for the Prandtl Supersonic Jet Problem. By C. Jacob	115
Kinematics of Mach Waves Inside and Outside Supersonic Jets By H. Oertel, Sen.	121
Boundary-Layer Visualization in a Shock Tube. By W. Merzkirch	137
Die Dichteverteilung in einem stationären, rotationssymmetrischen Überschall- freistrahle, der gegen schwachen Unter- oder Überdruck austritt Von G. Grabitz, W.J. Hiller und G.E.A. Meier	144

Chapter 3 Nozzle Flow

Supersonic Nozzle Flowfields: A Comparison of Fully Viscous and Navier-Stokes Solutions. By N.K. Mitra and M. Fiebig	157
Numerical Estimations of Third Generation Gas Dynamic Lasers by Bow Shock Waves. By K. Kasuya, K. Horioka, H. Oertel, Jr., and B. Schmidt	166
On Flows with Heat Addition in Laval Nozzles. By W. Möhring	179

Chapter 4 Rarefied Gas Flow

Knudsen Layers. Theory and Experiment. By C. Cercignani	187
Nonstationary Heat and Mass Transfer Between Two Plane Surfaces in the Transition Knudsen Regime. By P. Gajewski	196
The Structure of a Shock Wave Close to a Wall. By F. Seiler and B. Schmidt ...	208
Hyperschall-Totwasser von Gemischen leichter und schwerer Gase geringer Dichte. Von W. Wuest	214
Flow in a Rapidly Rotating Cylinder with Mechanically Driven Recirculation By A. Cenedese and D. Cunsolo	225

Chapter 5 Computational Gas Dynamics

Numerical Aids to Theoretical Gas Dynamics. By G. Moretti and T. de Neef	239
Transonic Flow Computations by Finite Elements: Airfoil Optimization and Analysis. By A. Eberle	249
The Problem of Accuracy in Numerics and Thermodynamics at the Solution of the Hypersonic Boundary Layer Equations Including Chemical Reactions. By W. Schönauer, H.-G. Däubler and G. Glotz	257

Die Berechnung stationärer reibungsfreier Strömungsfelder um stumpfe Körper im schallnahen Überschall mittels eines zeitabhängigen Differenzenverfahrens Von C. Weiland	267
A Study of the Interaction Between Floating Heat Layer and Solid Wall By K. Förster	277
A Contribution to the Prediction of Distorted Flow in Axial Compressors By M. Pandolfi and G. Colasurdo	284

Part II Incompressible Flow

Chapter 6 Stability Phenomena

Das Cauchyproblem der Helmholtzschen Wirbelgleichung mit einer Differenzen- näherung. Von R. Rautmann	295
The Dilemma of Defining a Vortex. By H.J. Lugt	309
Higher Eigenstates of Görtler Vortices. By Th. Herbert	322
Görtler Vortices in the Nonlinear Region. By Y. Aihara	331
An Analytical Approach to the Determination of Neutral Stability Curves By K.G. Roesner	339
Rotationssymmetrische Strömungen im Kugelspalt. Von E. Krause und F. Bartels ..	346
Influence of Initial and Boundary Conditions of Bénard Convection By H. Oertel, Jr. and K.R. Kirchartz	355
Vertically Staggered Patterns in Free Convective Flow By J.N. Koster and U. Müller	367
Nonstationary Convection in a Rotating System. By F.H. Busse and R.M. Clever ..	376
Convection and the Solar Granulation. By A. Nesis	386
Die Stabilität der Strömung einer einfachen viskoelastischen Flüssigkeit in einem konvergenten Kanal gegen stationäre und periodische Störungen Von K. Strauss	396
Solution of Orr-Sommerfeld Problems Using the Factorisation (Riccati) Method By L. Kleiser	407
Vibrations and Stability in Nonlinear Systems with One Degree of Freedom By S. Nocilla	416

Chapter 7 Boundary Layer

Einige Überlegungen zur Geschwindigkeitsverteilung und zur Wandreibung in inkompressiblen rotationssymmetrischen turbulenten Grenzschichten mit Querkrümmung. Von H.H. Fernholz und Th. Podtschaske	427
---	-----

Unsteady Laminar Boundary Layers in an Incompressible Three-Dimensional Stagnation Flow. By I. Teipel	438
Second Order Boundary-Layer Effects for Large Injection or Suction By K. Gersten	446
On the Influence of the Molecular Prandtl Number on the Turbulent Prandtl Number. By M. Jischa and H.B. Rieke	457

Chapter 8 Jet Flow

On the Long-Range Action of Turbulent Pressure Fluctuations. By G.N. Abramovich	467
Unsteady Subsonic Turbulent Jets. By K. Bremhorst	480
Weak Buoyancy in Laminar Vertical Jets. By W. Schneider and K. Potsch	501

Chapter 9 Airfoil Theory

The Wing Section Theory of Kutta and Zhukovski. By I. Tani	511
The Inverse Problem for Multiconnected Airfoil Systems. By W.J. Prosnak	517

Chapter 10 Fluid Machinery

Untersuchung des Druckverlustes und des Wärmeüberganges in rotierenden Kanälen mit rechteckigem Querschnitt. Von R. Schilling und H. Marcinowski	529
Berechnung der ausgebildeten Strömung in gekrümmten Kanälen mit rechteckigem Querschnitt. Von R. Schilling und R. Simon	546
Small Disturbance Swirl Flow in Turbomachinery Bladings. By F.G. Sator	577
A Method for Designing Radial Rotor Blades by Means of Surfaces of Revolution By S. Zarea	568

Chapter 11 Miscellaneous Problems

Dynamics of a Nuclear-Reactor Shell Structure in an Incompressible Fluid By U. Schumann	577
Sustained Flow Oscillations in a Thermal-Hydraulic Coupled System. By S. Lin	587
Finite-Difference Simulation of Tsunami Propagation By Yu.I. Shokin and L.B. Chubarov	599
On a Continuum Model of Blood Flow. By C. Ferrari	607
Über den Einfluß der Reibung in den Energiegleichungen der Strömungsmechanik By E. Truckenbrodt	616
A New Method of Analysing Hot-Wire Signals and Its Dependence on Cooling Law and Probe Position. By M. Acrivlellis and K.O. Felsch	627
