

Table of Contents

	Page
Chapter I. Introduction	1
1. Radiation gasdynamics	1
2. Thermal radiation effects	2
3. Some thermal radiation phenomena	4
References	6
Chapter II. Fundamentals of Radiative Transfer	8
1. Specific intensity	8
2. The flux of radiation	9
3. Energy density of radiation	11
4. The stress tensor of radiation	12
References	14
Chapter III. Equation of Transfer of Radiation	15
1. Introduction	15
2. Absorption coefficient	15
3. Emission coefficient	20
4. The equation of radiative transfer	21
5. A solution of the equation of radiative transfer	23
References	23
Chapter IV. Radiative Equilibrium	25
1. Introduction	25
2. Kirchhoff's law of radiation	25
3. Wien's displacement law	27
4. Planck's radiation law	29
5. Stefan-Boltzmann's law of radiation	32
6. Adiabatic changes in an inclosure containing matter and radiation	32
7. Local thermodynamic equilibrium	34
References	34
Chapter V. Fundamental Equations of Radiation Gasdynamics	35
1. Introduction	35
2. Equation of state	36
3. Equation of continuity	36
4. Equations of motion	36
5. Equations of energy	37
6. Equation of radiative transfer	37
7. General remarks on the fundamental equations	38
8. Case of small mean free path of radiation	39
9. Case of finite mean free path of radiation	41
10. One dimensional radiative transfer	45
11. The exponential integrals	47
References	49
Chapter VI. Boundary Conditions of Radiation Gasdynamics	51
1. Introduction	51
2. Boundary conditions of gasdynamic field	51
3. Boundary conditions of radiation field	52
4. Smooth surface	53

	Page
5. Rough surface	55
6. Radiative transfer between two opaque parallel plates	59
7. Emissivity of a constant temperature gas layer	61
8. Radiation slip at finite mean free path of radiation	63
References	64
Chapter VII. Similarity Parameters of Radiation Gasdynamics	66
1. Introduction	66
2. Dimensional analysis and π -theorem	66
3. Non-dimensional equations of radiation gasdynamics	69
4. Important parameters of radiation gasdynamics	71
5. Some further remarks for the non-dimensional parameters	75
References	80
Chapter VIII. Waves and Shock Waves in Radiation Gasdynamics	82
1. Introduction	82
2. Wave of small amplitude in an optically thick medium	82
3. Wave of small amplitude in an radiating gas of finite mean free path of radiation	92
4. Shock waves in an optically thick medium	98
5. Shock wave structure in an optically thick medium	103
6. Shock wave in a medium of finite mean free path of radiation	106
7. Flow field behind shock waves	112
References	120
Chapter IX. Heat Transfer in Radiation Gasdynamics	122
1. Introduction	122
2. Radiative heat transfer in a non-absorbing medium	123
3. Radiative heat transfer in an absorbing medium	125
4. Heat transfer by simultaneous heat conduction and radiation in an absorbing medium	126
5. Radiative processes in the atmosphere	130
6. Flow between two parallel plates in radiation magnetogasdynamics	133
7. Boundary layer flow in radiation gasdynamics	141
8. Stagnation point heat transfer in radiation gasdynamics	149
9. Miscellaneous problems of heat transfer in radiation gasdynamics	161
References	162
Chapter X. Kinetic Theory of Radiating Gases	164
1. Introduction	164
2. Molecular velocity and molecular distribution functions	165
3. Relativistic mechanics	166
4. Boltzmann equation for material particles	169
5. Boltzmann equation for photons	174
6. Conservation equations	175
7. Radiation stresses and radiation energy density	180
8. Local thermodynamic equilibrium	184
9. Rarefied radiation gasdynamics	186
10. Free molecule flow	191
References	196
Chapter XI. Radiative Properties of High Temperature Gases	197
1. Introduction	197
2. Classical theory of absorption and emission of radiation	198
3. The quantum theory of radiation	202
4. Spectroscopy of high temperature gas	206
5. The absorption coefficient of high temperature gases	208
6. Scattering coefficient of radiation	211
7. Planck and Rosseland mean absorption coefficients of air and hydrogen	214
8. Some experimental investigations of opacity of gases	217
9. Non-equilibrium radiation	217
References	218
A List of Important Symbols	220
Author Index	224
Subject Index	226
