ELECTROMAGNETIC WAVES IN A PLASMA

by V. D. Shafranov 1

Introduction 1

§ 1. Dispersion Equation (General Relations) 2

§ 2. Unmagnetized Plasma. Hydrodynamic Approximation 11

§ 3. Plasma in a Magnetic Field. Hydrodynamic Approximation . . 18

§ 4. Resonances Due to Thermal Motion 38

§ 5. Damping of Plasma Waves. 41

§ 6. Maxwell's Equations in an Anisotropic Medium with Spatial
Dispersion. 49

§ 7. Characteristic Oscillations of a Plasma and Propagation
of Electromagnetic Waves in a Plasma. 61

§ 8. The Correlation Function for Microcurrents. 69

§ 9. Electrical Permittivity 77

§10. Oscillations of a Plasma in a Magnetic Field Taking Account
of the Thermal Motion with $B_0 = 0$ 87

§11. Plasma Oscillations in a Magnetic Field Taking Account
of Thermal Motion with $B_0 \neq 0$ 90

§12. Energy Loss of a Charged Particle Moving in a Plasma. 104

§13. Effect of Radiation Friction and Fluctuating Fields on Motion
of a Charged Particle in a Plasma. 120

§14. Fluctuations in a Plasma. Scattering of Waves [58-60] 129

§15. Equation for Energy Transfer of Electromagnetic Waves [62-64] 140

Appendix I 145

Appendix II 146

Appendix III. 147

References. 154

OSCILLATIONS OF AN INHOMOGENEOUS PLASMA

by A. B. Mikhailovskii 159

Introduction. 159

§ 1. Dielectric Constant of an Inhomogeneous Plasma	159
§ 2. Drift Instability of a Plasma	172
§ 3. Review of Work on Drift Instabilities	179
§ 4. Progress in Methods of Investigating the Oscillations of an Inhomogeneous Plasma	191
§ 5. Drift Instabilities in a Plasma in a Sheared Magnetic Field . .	199
§ 6. Flute Instability of a Plasma with Finite Ion Larmor Radius . .	203
§ 7. Drift Excitation of Flute Instabilities	210
Appendix I	215
Appendix II	215
Appendix III	217
Appendix IV	225
References	226
THEORY OF A WEAKLY TURBULENT PLASMA	
by A. A. Vedenov	229
§ 1. Plasmon — Particle Interactions	229
§ 2. Basic Equations of the Quasi-Linear Theory	231
§ 3. Relaxation of Plasma Oscillations	243
§ 4. Growth of Perturbations in an Unstable Plasma	253
§ 5. Interaction of a Beam with Plasma	255
§ 6. Threshold for Wave Absorption in a Plasma and Turbulent Heating	261
§ 7. Plasmon — Plasmon Interactions	264
§ 8. Three-Plasmon Processes	266
§ 9. Higher-Order Processes	272
References	275
SYMMETRIC MAGNETOHYDRODYNAMIC FLOW AND HELICAL WAVES IN A CIRCULAR PLASMA CYLINDER	
by L. S. Solov'ev	277
Introduction	277
§ 1. Stationary Helical Flow	278
§ 2. Helical Waves	288
§ 3. Stability of a Cylindrical Plasma Jet in a Magnetic Field . . .	296
§ 4. Nonlinear Longwave Axisymmetric Oscillations of a Plasma Cylinder	301

§ 5. Nonlinear Helical Waves	307
§ 6. Linear Waves in a Compressible Plasma	317
References	323
