<i>Preface</i>	ix
<i>Acknowledgments</i>	xi
<i>List of Symbols</i>	xii
Chapter I Introduction	1
Chapter II Theory	
II.1. GENERAL FORMULATION	5
II.2. QUASI-STATIC APPROXIMATION	7
II.2a. Field Strength Distribution Function	14
II.2b. Perturbation Theory	24
II.2c. Atomic Matrix Elements	30
II.3. IMPACT APPROXIMATION	32
II.3a. Hydrogen Lines	39
II.3b. Hydrogenic Ion Lines	46
II.3c. Two- and More-Electron Atoms	51
II.3d. Two- and More-Electron Ions	72
II.3e. Quantum-Mechanical Calculations of Electron Impact Broadening	87
II.3f. Corrections for Ion Broadening of Isolated Lines	93
II.4. INTERMEDIATE APPROXIMATIONS	99
II.4a. The Phase Integral Method	100
II.4b. Relaxation Theory	110

II.4c.	Dynamical Corrections to the Holtsmark Theory	119
II.4d.	The One-Electron Approximation	130
II.5.	CORRELATION EFFECTS	140
II.5a.	Debye Shielding	140
II.5b.	Plasma Polarization Shift	146
II.5c.	Plasma Satellites	153
II.6.	MAGNETIC FIELD EFFECTS	162

Chapter III Experiments

III.1.	GENERAL CONSIDERATIONS	168
III.2.	HYDROGEN LINES	170
III.2a.	The Balmer β Line	170
III.2b.	Other Balmer Lines at High Electron Densities	177
III.2c.	Balmer and Paschen Lines at Low Electron Densities and Temperatures	182
III.3.	IONIZED HELIUM LINES	184
III.4.	HYDROGENIC LINES FROM HEAVY IONS	189
III.5.	LINES WITH FORBIDDEN COMPONENTS	190
III.6.	ISOLATED NEUTRAL ATOM LINES	196
III.7.	ISOLATED LINES FROM SINGLY CHARGED IONS	203
III.8.	ISOLATED LINES FROM MULTIPLY CHARGED IONS	212
III.9.	ASYMMETRIES AND SHIFTS OF HYDROGEN LINES	214
III.10.	EFFECTS OF SUPRATHERMAL FIELD FLUCTUATIONS	218

Chapter IV Applications

IV.1.	DENSITY MEASUREMENTS	226
IV.2.	TEMPERATURE MEASUREMENTS	231
IV.3.	AMPLITUDES AND SPECTRA OF PLASMA WAVES	232
IV.4.	STELLAR ATMOSPHERES	236
IV.4a.	Hydrogen and Ionized Helium Lines	236
IV.4b.	Lines with Forbidden Components	243
IV.4c.	Isolated Lines	251
IV.5.	RADIO-FREQUENCY LINES	257
IV.6.	OPACITY CALCULATIONS	264

Appendix I	Stark Profiles for Hydrogen and Ionized Helium Lines	282
Appendix II	Coefficients for the Asymptotic Holtsmark Profiles of Hydrogen Lines	313
Appendix III	Fractional Intensity Widths of Hydrogen and Ionized Helium Lines	314
Appendix IV	Stark Broadening Parameters and Profiles for Isolated Neutral Atom Lines	320
Appendix V	Electron Impact Widths and Shifts of Isolated Lines from Singly Charged Ions	365
Appendix VI	Atomic Parameters for Neutral Helium Lines with Forbidden Components	385
Appendix VII	"Dynamical" Profiles of Forbidden Components	386
	References	387
	<i>Author Index</i>	399
	<i>Subject Index</i>	405
