

CONTENTS

Table of Selected Notation	xiii
CHAPTER 1 <i>TRANSPORT OF RADIATION</i>	
1.1 The Field and Particle Equations	1
1.2 Dispersion Relations for Electromagnetic Fields in a Plasma	4
1.3 Energy Density and Energy Flow	9
1.4 Some Quantities Associated with Randomly Fluctuating Fields	16
1.5 Applications of Concepts in Geometrical Optics	26
1.6 The Equation of Transfer	29
1.7 Energy Transfer in Absorbing and Emitting Media	36
CHAPTER 2 <i>KIRCHHOFF'S RADIATION LAW</i>	
2.1 Black-Body Radiation	43
2.2 The Einstein Coefficients for Spontaneous and Stimulated Emission and Absorption	47
2.3 The Source Function and Kirchhoff's Law	52
2.4 The Interaction between the Radiation Field and the Velocity Distribution of the Electrons	61
	ix

CHAPTER 3 *EMISSION AND ABSORPTION
FROM BINARY ENCOUNTERS*

3.1	Radiation Spectrum of an Accelerated Charge	64
3.2	Bremsstrahlung from Electron-Atom Collisions	69
3.3	Plasma Dispersion Effects	77
3.4	Electron-Ion Encounters (Classical)	82
3.5	Electron-Ion Encounters (Quantum-Mechanical)	89
3.6	Emission from a Partially Ionized Gas	96

CHAPTER 4 *FLUCTUATIONS*

4.1	The Fluctuation-Dissipation Theorem for a Thermal Medium	100
4.2	Fluctuations of the Electromagnetic Field	107
4.3	Use of the Fluctuation-Dissipation Theorem for Bounded Media	112
4.4	Emission and Absorption of Longitudinal Waves in the Presence of Collisions	115
4.5	Longitudinal Dielectric Coefficient $K_L(k, \omega)$ of a Fully Ionized Plasma	117
4.6	The Microfield Spectrum of a Plasma not in Thermal Equilibrium	126

CHAPTER 5 *COLLECTIVE EMISSION PHENOMENA*

5.1	Bremsstrahlung from Collective Coulomb Interactions	131
5.2	Emission from the "Quiet" Sun	138
5.3	Nonthermal Emission Near the Plasma Frequency (Emission from the "Disturbed" Sun)	141
5.4	The rf Conductivity and Absorption Coefficient of a Fully Ionized Plasma	146
5.5	Coupling of Longitudinal and Transverse Electromagnetic Waves at Boundaries	150
5.6	Emission and Scattering by a Cylinder of Plasma	158
5.7	Impedance of an Antenna Driving Plasma Oscillations	168

CHAPTER 6 *CYCLOTRON EMISSION*

6.1	Cyclotron Emission of an Electron in a Static Magnetic Field	177
6.2	Cyclotron Radiation by Nonrelativistic Electrons	182
6.3	Emission by Highly Relativistic Electrons	189

6.4	Emission from Mildly Relativistic Electrons	200
6.5	Echo Phenomena Near the Electron Cyclotron Frequency	210

CHAPTER 7 *WAVES IN A MAGNETOACTIVE PLASMA*

7.1	Waves in a Cold Plasma	214
7.2	The rf Conductivity of a Hot, Collisionless Plasma	227
7.3	Transverse Electromagnetic Waves	230
7.4	The Dielectric Coefficient for Longitudinal Waves in a Magnetic Field	234
7.5	Longitudinal Oscillations in a Bounded Plasma	239
7.6	Generation of Longitudinal Waves by the Electrons of a Plasma	246

CHAPTER 8 *SCATTERING OF ELECTROMAGNETIC
WAVES FROM DENSITY FLUCTUATIONS*

8.1	General Theory of Scattering	254
8.2	Spectrum of Density Fluctuations, $S(\mathbf{k}, \omega)$	260
8.3	Scattering from Unscreened Electrons	263
8.4	Collective Effects in the Scattering from a Thermal Plasma	267
8.5	Scattering from Enhanced Fluctuations	272

CHAPTER 9 *MICROINSTABILITIES*

9.1	General Remarks on the Occurrence of Instabilities	283
9.2	Longitudinal Wave Instabilities	289
9.3	Transverse Wave Instabilities	300

CHAPTER 10 *EXPERIMENTAL METHODS*

10.1	Flow of Radiation in Waveguides	311
10.2	Reception of Radiation with Antennas	315
10.3	Radiation by Plasmas in Waveguides and Resonant Cavities	320
10.4	Radiometers	329

<i>SOME CONSTANTS</i>	337
