

## TABLE OF CONTENTS

Chapter I. PASSAGE OF HEAVY CHARGED PARTICLES THROUGH MATTER . . .	1
§ 1. Introduction . . . . .	1
§ 2. Elastic collisions and energy transfer in elastic scattering of particles by nuclei (atoms) . . . . .	3
§ 3. Excitation of nuclei and nuclear reactions induced by fast charged particles . . . . .	34
§ 4. Theory of energy loss of particles in inelastic collisions with atomic electrons . . . . .	40
§ 5. Experimental verification of the stopping theory and data on the ionization energy losses of fast protons and $\alpha$ -particles . . . . .	66
§ 6. Experimental data on the relation between range and energy for fast protons and for $\alpha$ -particles . . . . .	85
§ 7. Inelastic collisions of heavy charged particles with atoms. The stopping process and the ranges of heavy ions in matter . . . . .	112
§ 8. Relation between energy losses and ionization . . . . .	140
§ 9. Vavilov-Cerenkov radiation . . . . .	149
§ 10. Some methods of identifying fast charged particles and their energy measurements . . . . .	151
CHAPTER II. PASSAGE OF ELECTRONS THROUGH MATTER . . . . .	158
§ 11. Introduction . . . . .	158
§ 12. Elastic scattering of electrons (positrons) . . . . .	159
§ 13. Ionization energy losses . . . . .	175
§ 14. Radiation energy losses. Total energy lost by an electron . . . . .	184
§ 15. Relationship between range and energy of electrons . . . . .	192
§ 16. Connection between energy losses and ionization . . . . .	199
BIBLIOGRAPHY . . . . .	207
EXPLANATORY LIST OF ABBREVIATIONS . . . . .
