

Contents

Preface v

Part I

ASTROPHYSICAL ASPECTS OF AUTOIONIZATION

Astrophysical Implications of Autoionization 1

Leo Goldberg

Dielectronic Recombination 25

Alan Burgess

Part II

THEORETICAL ASPECTS OF AUTOIONIZATION

Resonances in Cross Sections. Their Nature and Origin 33

E. Gerjuoy

The Art and Science of Calculating Autoionization 55

A. Temkin

Close-Coupling Calculations and Results 77

P. G. Burke

M-Matrix Extrapolation Methods 99

Kenneth Smith

Part III

LABORATORY EXPERIMENTAL ASPECTS OF
AUTOIONIZATION

Qutoionization Effects in Ultraviolet Absorption Spectra of Hot Gases	111
<i>W. R. S. Garton</i>	
Autoionization Spectra of the Noble Gases	129
<i>R. P. Madden and K. Codling</i>	
Index	153
