

CONTENTS

1	<i>V. Ya. Veldre</i> Collisions of slow electrons with atoms	1
2	<i>R. Ya. Damburg</i> The inclusion of strong coupling in electron collisions with hydrogen atoms	10
3	<i>R. Ya. Damburg and R. K. Peterkop</i> Slow electron collisions with hydrogen atoms	15
4	<i>R. Ya. Damburg</i> The asymptotics of functions which describe partial waves	35
5	<i>R. Ya. Damburg and E. M. Karule</i> Positron collisions with hydrogen atoms	40
6	<i>R. Ya. Damburg and R. K. Peterkop</i> Resonance phenomena in electron scattering by hydrogen atoms	44
7	<i>G. F. Drukarev and V. D. Obiedkov</i> The role of polarization effects in inelastic electron collisions with atoms	53
8	<i>L. A. Vainstein</i> Radial equations in atomic collision theory	63
9	<i>M. K. Gailitis</i> A Coulomb-Born approximation for s - s transitions	81
10	<i>M. K. Gailitis</i> The use of the Bethe approximation in calculating the excitation cross-section of ions by electrons	87
11	<i>M. K. Gailitis</i> The behaviour of cross-sections near the threshold for a new reaction in the case of the attractive coulombic field	92
12	<i>M. K. Gailitis</i> Resonances in electron scattering by ions	104

CONTENTS

13	<i>R. K. Peterkop</i>	
	The conservation of particle flux in collisions	107
14	<i>V. Ya. Veldre and I. J. Vinkaln</i>	
	Calculations of ionization cross-sections of the hydrogen atom with the use of a plane wave approximation	114
15	<i>V. Ya. Veldre and E. M. Karule</i>	
	Ionization of the hydrogen atom by slow electrons	119
16	<i>V. Ya. Veldre and A. V. Lyash</i>	
	Ionization of the helium atom near the threshold energy	127
17	<i>A. V. Lyash</i>	
	Ionization of the helium atom accompanied by excitation	131
	Index	135
