

CONTENTS

<i>List of Contributors</i>	ix
<i>Preface</i>	xi
<i>Contents of Volume 2</i>	xiii

Chapter 1 Recent Advances in Flow Tubes: Measurement of Ion–Molecule Rate Coefficients and Product Distribution

D. SMITH AND N. G. ADAMS

I. Introduction	2
II. The Flowing Afterglow	5
III. The Flow–Drift Tube	13
IV. The Selected Ion Flow Tube (SIFT)	19
V. Future Developments	37
References	40

Chapter 2 Ion Chemistry of the Earth's Atmosphere

E. E. FERGUSON, F. C. FEHSENFELD,
AND D. L. ALBRITTON

I. Introduction	45
II. E- and F-Region Ion Chemistry	47
III. D-Region Positive Ion Chemistry	57
IV. D-Region Negative Ion Chemistry	60
V. Stratospheric and Tropospheric Positive Ion Chemistry	67
VI. Stratospheric and Tropospheric Negative Ion Chemistry	75
VII. Summary	78
References	78

Chapter 3 Classical Ion–Molecule Collision Theory

TIMOTHY SU AND MICHAEL T. BOWERS

I. Introduction	84
II. Pure Polarization Theory	84
III. Ion–Dipole Theory	87
IV. Ion–Quadrupole Theory	108
V. Effect of Induced Dipole–Induced Dipole Forces on Ion–Molecule Collisions	111
VI. Other Theories	113
VII. Summary and Prognosis	113
Appendix A. Calculation of $\overline{\theta(r)}$ and $\overline{d\theta(r)/d}$ for the ADO $\cos \bar{\theta}$ Model	114
Appendix B. Calculation of $\overline{\cos \theta(r)}$ for the ADO $\cos \theta$ Model	115
Appendix C. Calculation of the r -Dependent Average Rotational Energy in the Plane of Collision in the AADO Theory	116
References	117

Chapter 4 Statistical Methods in Reaction DynamicsWALTER J. CHENAVICH AND MICHAEL T.
BOWERS

I. Introduction	119
II. Statistical Theory	120
III. The Orbiting Transition State	128
IV. Application to Chemical Systems	137
V. Conclusions	148
References	149

Chapter 5 State Selection by Photoion–Photoelectron Coincidence

TOMAS BAER

I. Introduction	153
II. Experimental Considerations	154
III. Applications	163
IV. Future Developments	191
References	193

Chapter 6 Temperature and Pressure Effects in the Kinetics of Ion–Molecule Reactions

MICHAEL MEOT-NER (MAUTNER)

I. Introduction	198
II. Temperature Effects in Bimolecular Exchange Reactions	202

III. Temperature and Pressure Effects in Association Reactions	227
IV. Temperature and Pressure Effects in the Thermal Decomposition of Gaseous Ions	258
V. Conclusions	263
References	268

***Chapter 7* Energy Distribution in the Unimolecular Decomposition of Ions**

J. L. FRANKLIN

I. Introduction	273
II. Theoretical Considerations	274
III. Experimental Methods	278
IV. Results and Discussions	281
V. Summary	299
References	302

***Chapter 8* On the Rapidity of Ion–Molecule Reactions**

V. L. TALROSE, P. S. VINOGRADOV,
AND I. K. LARIN

I. Introduction	305
II. Some Characteristic Features of Ion–Molecule Reactions	307
III. Application of Orbital Symmetry Conservation Rules and Correlation Diagrams to Ion–Molecule Reactions	131
IV. Isotope Exchange Reaction of Ion–Molecule Collisions	317
V. Exchange Reactions of Ion Clusters	328
VI. Vibronic–Translation Relaxation of Ion–Atom Collisions	334
VII. Some Rules for Qualitative Estimation of Rate Constants of Exothermic and Thermoneutral Ion–Molecule Reactions	342
References	345
