

Contents

Chapter 1

A Review of Vibrational Excitations of Molecules by Electron Impact at Low Energies	1
--	----------

George J. Schulz

Chapter 2

Atomic Processes in Planetary Atmospheres	57
--	-----------

Manfred A. Biondi

Chapter 3

Applications and Needs	81
-------------------------------	-----------

Arthur V. Phelps

Chapter 4

Laboratory Experiments	107
-------------------------------	------------

Franz Linder

Chapter 5

The State of the Theory	147
--------------------------------	------------

Neal Lane

Chapter 6

Problems and Possibilities in the Study of Electron-Molecule Collisions	185
--	------------

Harrie S. W. Massey

Author Index	191
