

CONTENTS

| | |
|----------------------------------------------------------------------------|------------|
| Chapter 1. Atomic Processes in Thermonuclear Fusion | |
| Plasmas | 1 |
| R. K. Janev | |
| 1. Introduction | 1 |
| 2. Atomic Processes in the Central Plasma Region | 7 |
| 3. Atomic Processes in the Edge Plasma | 31 |
| 4. Summary and Outlook | 56 |
| References | 58 |
| Additional Reading | 59 |
| Chapter 2. Atomic and Molecular Processes in Muon-Catalyzed Fusion | 61 |
| J. S. Cohen | |
| 1. Introduction | 61 |
| 2. Overview | 64 |
| 3. Muonic Atom Formation | 69 |
| 4. Muonic Atom Collisions | 75 |
| 5. Muonic Molecules | 84 |
| 6. Fusion in Muonic Molecules | 95 |
| 7. Muon Loss | 97 |
| 8. Energy Balance | 102 |
| Acknowledgements | 103 |
| Appendix: Scaling from Normal to Muonic | |
| Atoms and Molecules | 103 |
| References | 106 |
| Additional Reading | 109 |
| Chapter 3. Progress in Atomic Collisions with Multiply Charged Ions | 111 |
| C. L. Cocke | |
| 1. Physical Setting | 111 |
| 2. Tools Available | 112 |
| 3. Low Energy Collisions: Outer Shell Processes | 120 |
| 4. Electron-Ion Collisions | 138 |
| 5. Concluding Comments | 161 |
| References | 161 |
| Chapter 4. Cooler Storage Rings: New Tools for Atomic Physics | 169 |
| R. Schuch | |
| 1. Introduction | 169 |
| 2. Principles of Ion-Storage Rings | 171 |
| 3. Beam Cooling Techniques | 175 |
| 4. Cooled Stored Ion Beams | 182 |

| | |
|----------------------------------------------------------------------------------------------------------------------------|------------|
| 5. Stored Beam Lifetime and Related Experiments | 191 |
| 6. Collisions between Electrons and Stored Ions | 196 |
| References | 209 |
| Chapter 5. Atomic Collisions with Laser Excited Targets | 213 |
| N. Andersen | |
| 1. Introduction | 213 |
| 2. General Symmetry Considerations | 215 |
| 3. The Case of $S \rightarrow P$ Excitation | 218 |
| 4. Charge Transfer Processes | 223 |
| 5. Perspective | 235 |
| Acknowledgements | 235 |
| References | 235 |
| Suggestions for Further Reading | 236 |
| Chapter 6. Progress in Atomic Collision Theory: The Semiclassical Close-Coupling Model and the Physics it Describes | 239 |
| W. Fritsch | |
| 1. Introduction | 239 |
| 2. Simple Models for Atomic Transitions | 241 |
| 3. Close-Coupling Theory for One-Electron Systems | 244 |
| 4. Examples of Studies within the One-Electron Model | 253 |
| 5. Treatment of Two-Electron Systems | 271 |
| 6. Concluding Remarks | 279 |
| References | 280 |
| Suggested Readings | 281 |
| Chapter 7. Recent Progress in Atomic Photoionization with Synchrotron Radiation | 283 |
| F. Wuilleumier | |
| 1. Introduction | 283 |
| 2. Theoretical Considerations | 286 |
| 3. Major Progress in Experiments | 293 |
| 4. Correlation Effects in Single Photoionization | 300 |
| 5. Two-Electron Excited States | 307 |
| 6. Simultaneous Photoexcitation and Photoionization (ϵ, n) Processes | 319 |
| 7. Double Photoionization (ϵ, ϵ) Processes | 331 |
| 8. Conclusions | 346 |
| Acknowledgements | 347 |
| References | 347 |

| | |
|-------------------------------------------------------------------------------------------------------------------------|------------|
| Chapter 8. Classifications and Properties of Doubly Excited States of Atoms | 357 |
| C. D. Lin | |
| 1. Introduction | 357 |
| 2. Classification of Doubly Excited States | 359 |
| 3. Experimental Studies of Doubly Excited States | 362 |
| 4. Classification Schemes of Doubly Excited States | 371 |
| 5. Order and Regularity in Energy Levels, Radiative and Autoionization Rates | 380 |
| 6. Computational Methods | 390 |
| 7. Related Problems and Future Perspective | 396 |
| References | 399 |
| Chapter 9. Atomic and Molecular Multiphoton Processes in Intense Laser Fields | 403 |
| S. I. Chu | |
| 1. Introduction | 403 |
| 2. Time-Independent Approaches to Intense Field Multiphoton Processes: Floquet and Generalized Floquet Formalisms | 404 |
| 3. Applications of Time-Independent Floquet Theoretical Approaches to Atomic and Molecular Multiphoton Processes | 415 |
| 4. Time-Dependent Approaches to Atomic and Molecular Multiphoton Processes | 432 |
| 5. Recent Progress on Multiphoton Processes Induced by Intense Short Laser Pulse Fields | 433 |
| Acknowledgement | 437 |
| References | 438 |
| Suggestions for Further Reading | 440 |
| Chapter 10. Atoms in Static Electric and Magnetic Fields | 441 |
| S. Watanabe | |
| 1. Introduction | 441 |
| 2. The Non-Relativistic Hamiltonian and Preliminary Remarks | 446 |
| 3. Low-Energy Spectra | 448 |
| 4. Intermediate to High Energy Spectra | 461 |
| 5. Quantum-Classical Correspondence in Intermediate to High Energy Region | 487 |
| 6. Outlook and Conclusion | 504 |
| Acknowledgements | 506 |
| Appendix | 507 |
| References | 510 |

| | |
|-----------------------------------------------------|------------|
| Chapter 11. Atomic Collisions with Surfaces | 517 |
| J. Burgdörfer | |
| 1. Introduction | 517 |
| 2. Interaction Potentials | 520 |
| 3. Trajectories | 542 |
| 4. Electron Transfer in Ion-Surface Scattering | 554 |
| 5. Interaction of Highly Charged Ions with Surfaces | 582 |
| 6. Further Reading | 608 |
| Acknowledgments | 609 |
| References | 610 |
