

CONTENTS

<i>Preface</i>	v
<i>List of Contributors</i>	xi
1. Introduction to Molecular Ion Spectroscopy <i>G. Herzberg</i>	1
2. Spectroscopy of Molecular Ions in the Microwave Region <i>R. Claude Woods</i>	
I. Introduction	11
II. An Historical Sketch	13
III. Experimental Considerations	17
IV. Molecular Ions in the Interstellar Medium	23
V. Molecular Structure and Force Fields	31
VI. Electronic Structure and Properties	36
VII. Pressure Broadening	38
VIII. Dynamical Information and Discharge Diagnostics	40
IX. Conclusions	43
References	43
3. High-Resolution Infrared Spectroscopy of Molecular Ions <i>Alan Carrington and T. P. Softley</i>	
I. Introduction	49
II. Laser Magnetic Resonance	50
III. Infrared Difference - Frequency Laser Spectroscopy	52
IV. Fourier Transform Spectroscopy	55
V. Ion Beam Methods	57
A. Introduction	57
B. Charge Exchange Methods	59
C. Photodissociation and Predissociation Methods	61
D. HD^+	64
E. HeH^+	64
F. CH^+	68
G. H_3^+	69
References	71
4. The H_3^+ Ion <i>Takeshi Oka</i>	
I. Discovery of H_3^+	73
II. Ion-molecule Reactions	74
III. Ab-Initio Calculations	75
IV. H_3^+ in Discharges	77
V. H_3^+ in Interstellar Space	79
VI. Other Experiments	80
A. Collision Experiments	81
B. Recombination with Electron	81

C.	Structure of H_3^+	81
VII.	Spectroscopy of H_3^+	83
	References	85
5.	Spectroscopy of Molecular Ions in Noble Gas Matrices	
	<i>Lester Andrews</i>	
I.	Introduction	91
II.	Experimental Methods	92
III.	Alkali Metal Superoxides - $M^+O_2^-$	94
IV.	Ozonides - $M^+O_3^-$ and O_3^-	96
V.	Dihalides - $M^+X_2^-$	97
VI.	Bihalide Ions - HX_2^- and $M^+HX_2^-$	98
VII.	$Ar_N H^+$ and $Ar_N D^+$	99
VIII.	Trihalomethyl Cations	101
IX.	Parent Cations	104
X.	CX_2^+ and CHX_2^+ Cations	107
XI.	Benzyl and Tropylium Cations	109
XII.	Styrene Cations	111
XIII.	Naphthalene Cation	113
XIV.	Halomethane Parent Anions	117
XV.	Conclusions	119
	References	121
6.	Vibronic Spectroscopy and Photophysics of Molecular Ions in Low Temperature Matrices	
	<i>V. E. Bondybey and Terry A. Miller</i>	
I.	Introduction	125
II.	Experimental Techniques and General Observations	127
A.	Matrix Technique and Spectroscopic Tools	127
B.	Generation of Transient Species	129
C.	Solvent Cage Effect	130
D.	The Photoionization Process and Formation of Molecular Ions	131
E.	Vibrational Relaxation	133
F.	Fluorescence Lifetimes and Nonradiative Processes	136
G.	Effects of the Matrix on Ionic Spectra	137
H.	Negative Ions	145
III.	Spectroscopic Studies of Individual Ionic Species	146
A.	Benzenoid Radical Cations	146
B.	Pyridine Derivatives	156
C.	Acetylenic Cations	159
D.	Olefinic Cations	162
E.	CS_2^+ and Other Small Inorganic Cations	166
IV.	Summary	168
	References	168
7.	Emission and Excitation Spectroscopy of Open-shell Organic Cations	
	<i>Dieter Klapstein, John P. Maier, and Liubomir Misev</i>	
I.	Introduction	175
II.	Radiative and Non-radiative Decay	177
III.	Spectra of Cooled Ions	179

IV.	Experimental	179
A.	Emission Spectroscopy	179
B.	Laser Excitation Spectroscopy	182
V.	Examples	183
A.	General Remarks	183
B.	Emission Spectroscopy	185
C.	Laser Excitation Spectroscopy	189
D.	Lifetime Measurements	192
E.	Complementary Nature of Emission and Laser Excitation Spectroscopies: Dichlorodiacetylene Cation	194
VI.	Summary	198
	References	199
8.	The Jahn-Teller Effect in Benzenoid Cations: Theory and Experiment	
	<i>Terry A. Miller and V. E. Bondybey</i>	
I.	Introduction	201
II.	Experimental Observations	203
A.	General Considerations	203
B.	Experimental Results	204
III.	Theoretical Background	209
A.	Jahn-Teller Hamiltonian	209
B.	The Effective Potential	211
C.	The Dynamical Problem	213
IV.	Conclusions	216
A.	Spectral Analysis	216
B.	Stabilization Energy	220
C.	Distorted Geometry	220
	References	227
9.	Photofragmentation of Molecular Ions	
	<i>Robert Dunbar</i>	
I.	Introduction	231
II.	Experimental Methods	232
A.	Ion Beams	232
B.	Drift-tube Mass Spectrometers	233
C.	Tandem Quadrupoles	233
D.	Ion Cyclotron Resonance Ion Traps	233
III.	Dynamics and Kinetics of Photofragmentation	235
A.	Fragmentation Products	235
B.	Kinetic Energy Release	238
C.	Angular Dependence	242
D.	Relaxation of Excited Ions	244
E.	Multiphoton Photochemistry with Infrared Photons	248
IV.	Photodissociation Spectroscopy of Ions	249
A.	Ion Spectra at Extreme High Resolution	249
B.	Spectroscopy of Organic Ions	250
C.	Infrared Spectroscopy	251
V.	Ion Structures and Rearrangements	254
A.	Diene Radical Ions	254
B.	Benzyl Chloride	256
C.	Cyclic Dienes	258

D.	Cis-trans Isomerism: Chloropropene and Stilbene Ions	258
E.	Dissociation with Rearrangement	259
	References	260
