

CONTENTS

H S W Massey - Life, Work, Personality and Characteristics Sir David R Bates	1
LECTURES ON FUNDAMENTAL PROCESSES IN ATOMIC COLLISION PHYSICS	
Introduction to Fundamental Interactions in Atomic Collisions E Merzbacher	31
Electron Atom Scattering Theory P G Burke	51
Density Matrices, State Multipoles, and Their Physical Interpretation K Blum	103
Polarization Effects in Electron Atom Collisions B Bederson	133
Theory of Heavy-Particle Collisions J S Briggs	159
Angular Correlation and Polarization Studies of Atomic Collisions R Hippler	181
Ion-Molecule Association D R Bates	215
Many Body Calculations in Atomic Physics H P Kelly	239
Angle- and Spin-Resolved Photoelectron Spectroscopy U Heinzmann	269

Atomic Processes Under Strong Electromagnetic Fields P Lambropoulos	295
Particle-Atom Collisions in Strong Laser Fields G Ferrante	343
Applications of Atomic Collision Processes in Astrophysics D L Moores	397
The Einstein-Podolsky-Rosen Paradox Fifty Years Later F Selleri	421
SYMPOSIUM ON NEW TRENDS IN ATOMIC COLLISION PHYSICS - HONORARY CHAIRMAN - U. FANO	
New Applications of Electron-Electron Coincidences W Sandner	453
Collisional Spectroscopy of Laser Excited Atoms M Allegrini	469
Anisotropy in Photofragmentation C H Greene	489
Low Energy Atom Collisions M Faubel	503
Electron Correlation Effects in Electron-Atom Collisions H G M Heideman	521
The Role of Electron Spin in Atomic Collisions W Jitschin	539
Polarization Correlation in Simultaneous Two-Photon Decay Processes and Tests of Bell's Inequality A J Duncan, W Perrie, H J Beyer and H Kleinpoppen	555
CONTRIBUTED PAPERS	
<u>Electron-Atom Collisions</u>	
Stokes Parameters $\eta_{1,2,3}$ and Scattering Parameters λ, χ for Positive and Negative Scattering Angles in Electron- Photon Coincidence Experiments H-J Beyer, K Blum and M C Standage	573
A Test of the Influence of the Nuclear Spin in Electron Impact Excitation Processes K Bartschat, K Blum, P G Burke and N S Scott	579

Relativistic Third Born Approximation for Electron Capture	
W J Humphries and B L Moiseiwitsch	587
Inner-Shell Ionization by Transition Radiation	
H Genz	593
Applications of Stepwise Electron and Laser Excitation of Atoms to Atomic Collision Studies	
M C Standage	597
The Identification of Collisionally Excited Autoionizing States in Aluminium	
M Wilson, G K James, L F Forrest and K J Ross	613
Orbital Angular Momentum Exchange In Post-Collision Interaction	
P J M van der Burgt, J van Eck and H G M Heideman	619
Intermediate Energy Electron Impact Spectroscopy at Rio de Janeiro	
A C de A E Souza and G G B de Souza	627
e-e Correlation in (e-2e) Reaction: A Semiclassical Approach	
L Avaldi, R Camilloni, Yu V Popov and G Stefani	633
Stimulated Free-Free Transitions in a Coulomb Field	
V Véniard, A Maquet and M Gavrila	641
<u>Photon-Atom Interactions</u>	
Multiphotonionization of Xenon	
H J Humpert, R Hippler, H Schwier and H O Lutz	649
Theoretical Study of the Photoelectron Spectrum of Cesium	
P Decleva and A Lisini	657
Photoionization of Positive Atomic Ions	
I C Lyon	663
Calculation of Free-Free Radial Dipole Transition Amplitudes: An L^2 Basis Approach	
J T Broad and J Hinze	671
Buffer Gas Influence on Ion Collection in Cesium Two Photon Ionization and on UF_6 Photodissociation	
M I Schisano	677

Ion-Atom Collisions

Theoretical Treatment of Atomic Collision Processes R M Dreizler, A Henne, H J Lüdde, W Stich and A Toepfer	685
Proton-Impact Excitation of the 2p-Shell of Sodium Atoms O Schöllner and J S Briggs	697
Calculations of Ion-Induced K-Shell Ionization D J Land	703
Long-Range Processes in $\text{Na}^+\text{-Na}(3p)$ Collisions and Dependence on Initial 3p Excitation R J Allan, A Bahringer and J Hanssen	711
Slow Ion Atom Collisions in the Presence of a Strong Magnetic Field U Wille	719
Calculation of Charge Transfer Cross Section for Electron Capture Collisions by N^{2+} Ions in Neutral Atoms S Sharma	729
K-Shell Ionization in Relativistic Heavy Ion Collisions U Becker, S R Valluri, N Grün and W Scheid	737
Excitation of HE I Triplet Levels by Ion Impact A S Aynacioglu and G von Oppen	745

Atomic and Molecular Processes

Nonadiabatic Behaviour in Atomic and Molecular Processes: The Ridge Effect in Mode Transitions V Aquilanti, S Cavalli and G Grossi	757
Photon Correlations, Atomic State Correlations and Statistical Distributions L Moorman, J van Eck, H G M Heideman and G Nienhuis	765
Participants Photo	778
Author Index	781
Subject Index	783
