

CONTENTS

WELCOMING ADDRESS by D. Berényi	11
COULOMB IONIZATION (Light projectiles)	
S. T. Manson Theoretical studies of electron emission in ion-atom collisions: bare and structured projectiles	15
T. Mukoyama Electronic relativistic effects in ion-atom collisions	31
H. Paul and H. Muhr A small residual Z_2 -dependence of K-shell ionization cross-sections normalized by ECPSSR	49
R. D. DuBois Coincidence studies of secondary electron emission in light ion-atom collisions	57
ALIGNMENT STUDIES	
W. Jitschin, U. Werner, K. Finck and H. O. Lutz Dealignment and deexcitation of inner-shell vacancies	79
T. Papp Investigation of the multiple ionization effect on the L_3 -subshell alignment	97
T. J. M. Zouros, J. S. Greenberg and N. Tsoupas Measurement of the emission anisotropy of the $2p\sigma \rightarrow 1s\sigma$ MO transition in 40 MeV Ni+Ni collisions	105
MANY-ELECTRON CORRELATIONS	
J. F. Reading and A. L. Ford Scattering theory for ionization and charge transfer	117

R. L. Becker	
Vacancy-rearrangement theory in the first Magnus approximation	131

MULTIPLE IONIZATION (Heavy projectiles)

R. L. Becker, A. L. Ford and J. F. Reading	
Multiple vacancy production by high energy heavy ions	141
H. Schmidt-Böcking, C. L. Cocke, S. Kelbch, R. Mann, P. Richard and J. Ullrich	
Multiple ionization of argon atoms by fast uranium impact and its possible application as an ion source for highly ionized rare gas atoms	155
O. Benka	
Application of a PAX-spectrometer for measuring ion induced fluorine K X-rays	167
S. Ricz, I. Kádár, D. Varga, J. Végh, T. Borbély, V. A. Shchegolev, D. Berényi, G. Hock and B. Sulik	
High resolution spectra of Auger electrons from 5.5 MeV/amu $\text{Ne}^{3+} \rightarrow \text{Ne}$ and $\text{Ar}^{6+} \rightarrow \text{Ne}$ collisions	171
J. Végh and I. Kádár	
Software system for processing the raw experimental data at the electron spectrometer ESA-21	179
B. Sulik and G. Hock	
Geometrical encounter probability model in the description of multiple ionizations by fast heavy ions	183
L. Végh	
Ionisation in mean-electron-field Born approximation	191

X-RAY DEEXCITATION OF INNER SHELLS

B. Crasemann	
Fluorescence yields and x-ray production from atomic inner shells	199
P. H. Mokler, D. H. H. Hoffmann, W. A. Schönfeldt, Z. Stachura and A. Warczak	
L x-ray emission from highly charged Xe^{q+} on Xe collisions (3.6 MeV/u, $43 \leq q \leq 47$)	223

ELECTRON CAPTURE

K. Taulbjerg	
Theory of electron capture in energetic collisions	235

FORWARD ELECTRON EJECTION

I. A. Sellin, S. B. Elston and S. D. Berry Recent advances in forward electron production studies in ion-atom and ion-solid collisions	249
Á. Kövér, E. Szmola, Gy. Szabó, G. Hock, D. Berényi, L. Gulyás, E. Koltay, M. Burkhard and K.-O. Groeneveld A study of the electron spectra around O^0 for simple collision systems in the 0.8-2.4 MeV impact energy region	263

ION-SOLID INTERACTIONS

P. Koschar, J. Kemmler, M. Burkhard, D. Hofmann, R. Schramm, M. Breinig, S. B. Elston, I. A. Sellin, W. Meckbach and K.-O. Groeneveld Convoy electron yield enhancement by molecular heavy ions	271
R. Schramm, D. Hofmann, P. Koschar, H. J. Frischkorn, J. Kemmler and K.-O. Groeneveld Equilibrium charge state distribution of molecular fragments exciting carbon foils	281
N. Nešković Energy levels of channeled ions	289

CLOSING REMARKS by B. Crasemann	295
