

## CONTENTS

Preface .....	iii
<b>EFFECTIVE STOPPING-POWER CHARGE OF ENERGETIC ION IN METALS</b>	
<i>M. Kitagawa</i>	
I. Introduction .....	2
II. Electronic Distribution of Ionic Projectile .....	3
III. Effective Charge Derived from Stopping Power .....	6
IV. Scaling Curve .....	11
V. Concluding Remarks .....	15
Appendix: Parameters of Lenz-Jensen Model .....	19
<b>ION REVERSIBILITY STUDIES IN AMORPHOUS SOLIDS USING THE TWO-ATOM SCATTERING MODEL</b>	
<i>O. S. Oen</i>	
I. Introduction .....	40
II. Basic Formulation .....	41
III. Calculations .....	44
IV. Appendix .....	49
<b>CLASSICAL APPROACH TO THE RADIATION OF AXIALLY CHANNELED ELECTRONS</b>	
<i>Y. Yamamura and Y. H. Ohtsuki</i>	
I. Introduction .....	64
II. Computation Model .....	
2.1 Classical binary collision approximation .....	66
2.2 General expression for the intensity of the radiation .....	68
III. Radiation Produced by Axially Channeled Electrons .....	69
IV. Numerical Results and Discussion .....	71
V. Conclusions .....	79
<b>DYNAMICAL INTERACTION OF IONS WITH SURFACES</b>	
<i>Y. H. Ohtsuki</i>	
I. Introduction .....	98
II. Derivation of the Dynamical Surface Potential .....	98
III. Skipping Motion, Surface Energy Loss, Photon Emission .....	
3.1 Skipping motion .....	108
3.2 Surface energy loss .....	109
3.3 Photon emission during surface scattering .....	112
IV. Interaction between Two Ions near the Surface .....	114

**QUANTUM CALCULATION OF HEAVY PARTICLE  
BACKSCATTERING BY THIN CRYSTALS**

*P. B. Treacy*

I.	Introduction . . . . .	138
II.	Wave Function for Crystal-Particle Scattering . . . . .	140
III.	Inclusion of Screening and Lattice Correlations . . . . .	144
IV.	Backscattering Computations . . . . .	147
V.	Conclusion . . . . .	149
