

# *Contents*

<b>List of Frequently Used Symbols</b> . . . . .	xii
<b>Preface</b> . . . . .	xv
<b>Preface to English Edition</b> . . . . .	xvii
<b>1 Introduction</b> . . . . .	1
1.1 Ion Implantation and its Applications . . . . .	1
1.2 Historical Review . . . . .	3
<b>2 Theoretical Background of Ion Implantation</b> . . . . .	5
2.1 Range of Ions in Solids . . . . .	5
2.1.1 Nuclear Stopping . . . . .	8
2.1.2 Electronic Stopping . . . . .	11
2.1.3 Range Distribution . . . . .	12
2.2 Radiation Damage in Solids . . . . .	16
2.2.1 Structure of Defects . . . . .	17
2.2.2 Number of Displaced Atoms . . . . .	18
2.2.3 Range Distribution of Radiation Damage . . . . .	20
2.2.4 Formation of Amorphous Layers . . . . .	24
2.3 The Channelling Effect . . . . .	26
2.3.1 Critical Angle . . . . .	27
2.3.2 Channelling Profiles . . . . .	28
<b>3 Problems of Implantation into Real Solids</b> . . . . .	34
3.1 Effects and Annealing of Radiation Damage . . . . .	35
3.1.1 Defect Generation . . . . .	36
3.1.2 Alteration of Material Properties . . . . .	41
3.1.3 Recrystallization of Radiation Damage . . . . .	43

3.2	Electrical Activation of Implanted Ions . . . . .	52
3.2.1	Isochronal Annealing . . . . .	54
3.2.2	Isothermal Annealing . . . . .	58
3.3	Laser Annealing . . . . .	60
3.3.1	Pulsed Laser Annealing . . . . .	61
3.3.2	Continuous Laser Annealing . . . . .	63
3.4	Range Distribution in Two-layer Structures . . . . .	64
3.5	Masking Layers . . . . .	66
3.5.1	Contact Masking . . . . .	66
3.5.2	Projection Masking . . . . .	72
3.5.3	Edge Effects . . . . .	73
3.6	Lateral Spread . . . . .	74
3.7	Passivating Layers . . . . .	77
3.7.1	Passivation During Implantation . . . . .	77
3.7.2	Secondary Implantation . . . . .	79
3.7.3	Passivation Against Out-diffusion . . . . .	83
3.8	Sputtering During Implantation . . . . .	87
3.8.1	Sputtering Yield . . . . .	87
3.8.2	Profile Changes Due to Ion Sputtering . . . . .	91
3.9	Diffusion . . . . .	94
3.9.1	Thermal Diffusion . . . . .	95
3.9.2	Annealing in an Oxidizing Atmosphere . . . . .	104
3.9.3	Radiation-enhanced Diffusion . . . . .	107
3.9.4	Other Diffusion Effects . . . . .	113
3.10	Sample Heating . . . . .	114
<b>4</b>	<b>Ion-implantation Machines . . . . .</b>	<b>118</b>
4.1	Ion Sources . . . . .	118
4.1.1	Hot-cathode Sources . . . . .	119
4.1.2	Radio-frequency Ion Sources . . . . .	123
4.1.3	Penning Sources . . . . .	124
4.1.4	Other Ion Sources . . . . .	124
4.1.5	Ion-source Operation . . . . .	125
4.2	Acceleration and Focusing . . . . .	128
4.2.1	Acceleration . . . . .	129
4.2.2	Focusing . . . . .	130
4.2.3	Beam Writing . . . . .	132
4.2.4	Examples of Ion Accelerators . . . . .	135
4.3	Beam Analysis . . . . .	140
4.3.1	Magnetic Separation . . . . .	141
4.3.2	Wien Filter . . . . .	142
4.3.3	Resolving Power . . . . .	143
4.4	Beam Deflection and Homogeneity . . . . .	144
4.5	Sample Chambers . . . . .	149

4.5.1	Current Measurement . . . . .	149
4.5.2	Sample Orientation . . . . .	151
4.5.3	Heating and Cooling . . . . .	152
4.5.4	Examples of Implantation Chambers . . . . .	152
4.6	Vacuum . . . . .	160
<b>5</b>	<b>Measurement Techniques to Investigate Ion-implanted Layers . . . . .</b>	<b>162</b>
5.1	Staining of <i>p–n</i> Junctions . . . . .	163
5.2	Determination of the Conductivity Type . . . . .	163
5.3	Capacitance–voltage Measurements . . . . .	166
5.3.1	Limits of the Method . . . . .	167
5.3.2	Measurement Techniques . . . . .	173
5.4	Sheet Resistivity Measurements . . . . .	174
5.4.1	Four-point Measurements . . . . .	175
5.4.2	Resistor Structures . . . . .	180
5.5	Hall Effect Measurements . . . . .	182
5.5.1	Van der Pauw Structures . . . . .	182
5.5.2	Profile Measurement . . . . .	186
5.5.3	Layer Removal Techniques . . . . .	189
5.6	Spreading-resistance Measurements . . . . .	193
5.7	Current–voltage Measurements . . . . .	195
5.7.1	<i>p–n</i> Characteristics . . . . .	195
5.7.2	Determination of the Minority Carrier Lifetime . . . . .	199
5.8	Analysis of Implanted Layers using High-energy Light Ions . . . . .	200
5.8.1	Rutherford Back-scattering . . . . .	201
5.8.2	Channelling and Lattice Localization . . . . .	204
5.8.3	Ion-induced X-rays . . . . .	207
5.8.4	Ion-induced Nuclear Reactions . . . . .	210
5.9	Activation Analysis . . . . .	216
5.10	Secondary Ion Mass Spectroscopy . . . . .	221
5.11	Other Measurement Methods . . . . .	223
5.12	Comparison of the Various Measurement Methods . . . . .	224
<b>6</b>	<b>Properties of Ion-implanted Semiconductor Layers . . . . .</b>	<b>229</b>
6.1	Implantation in Silicon . . . . .	230
6.1.1	Aluminium . . . . .	232
6.1.2	Antimony . . . . .	234
6.1.3	Arsenic . . . . .	236
6.1.4	Boron . . . . .	246
6.1.5	Gallium . . . . .	261
6.1.6	Indium . . . . .	263
6.1.7	Phosphorus . . . . .	264
6.1.8	Implantation of Other Elements . . . . .	271
6.1.9	Gettering . . . . .	271

6.1.10	Oxidation of Implanted Silicon . . . . .	273
6.1.11	Laser Annealing . . . . .	275
6.2	Implantation into Germanium . . . . .	283
6.3	III-V Semiconductors . . . . .	289
6.3.1	Gallium Arsenide . . . . .	289
6.3.2	Other III-V Semiconductors . . . . .	304
6.3.3	Insulation Through Ion Implantation . . . . .	308
6.4	Implantation into II-VI and IV-VI Semiconductors . . . . .	311
6.5	Silicon Carbide . . . . .	313
<b>7</b>	<b>Devices . . . . .</b>	<b>316</b>
7.1	MOS Devices . . . . .	317
7.1.1	Self-aligned Gate . . . . .	317
7.1.2	Threshold-voltage Adjustment . . . . .	319
7.1.3	Depletion-load Transistors . . . . .	322
7.1.4	Complementary MOS Transistors . . . . .	326
7.1.5	Charge-coupled Devices . . . . .	328
7.2	Resistors . . . . .	330
7.2.1	Resistivity Range . . . . .	330
7.2.2	Temperature Coefficient . . . . .	333
7.2.3	Linearity . . . . .	334
7.3	Diodes . . . . .	334
7.3.1	Varicap Diodes . . . . .	334
7.3.2	IMPATT Diodes . . . . .	335
7.3.3	Silicon Multidiode Targets . . . . .	337
7.3.4	Solar Cells . . . . .	338
7.3.5	Nuclear Detectors . . . . .	338
7.3.6	Photodiodes . . . . .	340
7.3.7	Luminescence Diodes and Laser Diodes . . . . .	344
7.4	Bipolar Transistors . . . . .	347
7.5	Field Effect Transistors . . . . .	351
7.6	Various Semiconductor Devices . . . . .	353
<b>8</b>	<b>Implantation into Non-semiconductors . . . . .</b>	<b>356</b>
8.1	Implantation into Metals . . . . .	356
8.1.1	Corrosion . . . . .	357
8.1.2	Investigation of Reactor Materials . . . . .	359
8.1.3	Alteration of Mechanical Surface Properties . . . . .	364
8.1.4	Formation of Superconductors . . . . .	366
8.2	Implantation into Optical Materials . . . . .	369
8.3	Further Uses of Ion Implantation for Non-semiconductors . . . . .	372
<b>9</b>	<b>Appendix . . . . .</b>	<b>375</b>

9.1	Data on Semiconductors and Insulators . . . . .	375
9.2	Diffusion Coefficients . . . . .	375
9.3	Solubilities of Elements in Silicon and Germanium . . . . .	381
9.4	Range Tables . . . . .	382
9.5	Abundance of Isotopes . . . . .	420
9.6	Vapour Pressure . . . . .	423
9.7	Error Function . . . . .	425
<i>References</i> . . . . .		429
<i>Index</i> . . . . .		455
