## 1. Generation and Measurement of Atom and Radical Concentrations in Flow Systems

*Michael A. A. Clyne and Wing S. Nip*

I. Introduction	2
II. Description of Discharge Flow Systems	2
III. Production of Atoms	8
IV. Production of Molecular Radicals	20
V. Detection of Atoms and Radicals	22
References	50

## 2. High Temperature Flow Tubes. Generation and Measurement of Refractory Species

*Arthur Fontijn and William Felder*

I. Introduction	59
II. HTFFR (High Temperature, Fast Flow Reactor) Techniques	61
III. Further Techniques for Kinetic Measurements on Refractory Species	110
IV. Conclusions	140
References	142

## 3. Electronically Excited Long-Lived States of Atoms and Diatomic Molecules in Flow Systems

*J. H. Kolts and D. W. Setser*

I. Introduction	152
II. Flow Systems for Electronically Excited States: Total Quenching Rate Constants	155
III. Flow Systems for Electronically Excited States: Assignment of Products	173

IV. Excited Atomic States in Flow Systems	179
V. Excited Diatomic States in Flow Systems	203
VI. Summary	221
Appendix: Flowing Afterflow Studies of Ion-Molecule Reactions	221
References	222
<b>4. Production and Detection of Reactive Species with Lasers in Static Systems</b>	
<i>M. C. Lin and J. R. McDonald</i>	
I. Introduction	233
II. Brief Review of Conventional Photolytic Techniques	235
III. Laser Sources	252
IV. Generation of Reactive Species with Lasers	256
V. Monitoring of Reactive Species and Reactions with Lasers	266
VI. Ultrafast Processes	290
VII. Concluding Remarks	293
References	294
<b>5. Production of Small Positive Ions in a Mass Spectrometer</b>	
<i>Larry I. Bone</i>	
I. Introduction	305
II. Basic Instrumentation	307
III. Positive Ion Production	310
IV. Electron Impact	310
References	320
<b>6. Discharge-Excited Rare Gas Halide Lasers</b>	
<i>N. Djeu</i>	
I. Introduction	323
II. Construction and Operation of Discharge Rare Gas Halide Lasers	326
III. Specific Rare Gas Halide Laser Systems	335
IV. Frequency Control of the KrF Laser	341
V. Recycling of the Rare Gases	343
VI. Generation of Secondary Wavelengths	346
References	346
<i>Index</i>	349
