

CONTENTS

Chapter 1

ANALYTIC INSIGHTS INTO INTERMEDIATE-ENERGY HADRON-NUCLEUS SCATTERING

R. D. Amado

1. Introduction	1
2. Phenomenology of Intermediate-Energy Hadron-Nucleus Scattering	3
3. Brief Review of Optical Diffraction	6
4. Elastic Scattering	11
5. Inelastic Scattering	19
5.1. One Step	19
5.2. Two Step	25
5.3. Multistep	27
6. Spin Observables	31
7. New Direction	38
8. Summary and Conclusion	40
References and Notes	41

Chapter 2

RECENT DEVELOPMENTS IN QUASI-FREE NUCLEON-NUCLEON SCATTERING

**P. Kitching, W. J. McDonald, Th. A. J. Maris,
and C. A. Z. Vasconcellos**

1. Introduction	43
2. Review of the Theory	46

2.1. Qualitative Considerations	46
2.2. The Cross-Section Formula	48
2.3. Errors and Possible Correction	51
2.4. Remarks on Applications of the Formalism	55
3. Spin Dependence in $(p, 2p)$ Scattering	58
3.1. General Remarks	58
3.2. Some Properties of the Effective Polarization	59
3.3. Nuclear Structure and Effective Polarization	60
3.4. Experimental Results and Comparison with Calculation	62
4. Isospin Dependence	70
4.1. General Remarks	70
4.2. Corrections	71
4.3. Experimental Results and Comparison with Calculation	71
5. Remarks on Other Quasi-Free Reactions	73
6. Concluding Remarks	77
References	78

Chapter 3

ENERGETIC PARTICLE EMISSION IN NUCLEAR REACTIONS

David H. Boal

1. Introduction	85
2. Direct Interactions in the Nucleus	89
2.1. Quasi-Elastic Scattering	89
2.2. Theoretical Models	94
2.3. Coincidence Experiments as a Probe of Reaction Mechanisms	101
3. Thermalization and Multiple Scattering in Nucleon Emission	108
3.1. The Approach to Thermal Equilibrium	108
3.2. Is Chemical Equilibrium Achieved?	119
3.3. Cascade and Hydrodynamics	128
3.4. A Limiting Temperature in the Hadronic Medium?	132
3.5. Hanbury-Brown-Twiss Effect in the Nucleus	135
4. Light-Fragment Formation	141
4.1. Overview	141
4.2. Coalescence and Pickup Models	143

Contents

4.3. Statistical Models	153
4.4. Entropy in the Nucleus	158
4.5. Results from Coincidence Experiments	159
5. Production of Intermediate-Mass Fragments	164
5.1. Statistical Approach	164
5.2. Reaction Rates	173
5.3. Liquid-Vapor Phase Transitions	177
6. Summary	186
Appendix	189
References	195
