## **EXPERIMENTAL METHODS FOR STUDYING NUCLEAR DENSITY DISTRIBUTIONS**

**C. J. Batty, E. Friedman, H. J. Gils, and H. Rebel**

1.	Introduction . . . . .	1
2.	Nuclear Charge Distributions . . . . .	8
2.1.	Electron Scattering . . . . .	8
2.2.	Muonic Atoms . . . . .	12
2.3.	Electronic X Rays . . . . .	16
2.4.	Optical Isotope Shifts . . . . .	19
2.5.	Comparisons and Comments . . . . .	27
3.	Information on Specific Orbitals . . . . .	29
3.1.	Coulomb Displacement Energies . . . . .	29
3.2.	Nucleon Transfer Reactions . . . . .	33
3.3.	Charge-Exchange Reactions to Analog States . . . . .	42
3.4.	Magnetic Scattering of Electrons . . . . .	46
3.5.	Comparisons and Comments . . . . .	48
4.	Information on the Periphery of the Nucleus . . . . .	49
4.1.	Kaonic and Antiprotonic Atoms . . . . .	51
4.2.	Pionic Atoms . . . . .	58
4.3.	$K^-$ and $\bar{p}$ Reactions with Nuclei . . . . .	58
4.4.	Comments . . . . .	68
5.	Information on the Nuclear Surface . . . . .	68
5.1.	Total and Reaction Cross Sections at High Energies . . . . .	70

5.2. Model-Independent Methods for the Analysis of Scattering Experiments . . . . .	79
5.3. Folding Model Approaches to the Optical Potential . . . . .	87
5.4. Low- and Medium-Energy Proton Scattering . . . . .	95
5.5. Diffraction Scattering of Low- and Medium-Energy Alpha Particles . . . . .	102
5.6. Scattering of Intermediate-Energy Pions . . . . .	112
5.7. Scattering of Low-Energy Antiprotons . . . . .	115
6. Toward the Nuclear Interior . . . . .	120
6.1. Intermediate-Energy Alpha-Particle Scattering . . . . .	120
6.2. Double-Folding versus Single-Folding in Analyses of Complex Particle Scattering and the Choice of the Interaction	134
6.3. Scattering of Intermediate-Energy Protons . . . . .	141
6.4. Scattering of Low-Energy Pions . . . . .	155
7. Future Methods and Probes . . . . .	161
7.1. Combined Analysis of Different Types of Experiments . .	161
7.2. $K^+$ Scattering . . . . .	164
8. Concluding Remarks . . . . .	168
Acknowledgments . . . . .	171
References . . . . .	172

*Chapter 2*

## THE MESON THEORY OF NUCLEAR FORCES AND NUCLEAR STRUCTURE

**R. Machleidt**

1. Introduction . . . . .	189
2. Historical Overview . . . . .	190
2.1. The “Hypothetical” Period . . . . .	190
2.2. The Pion as <i>the</i> Quantum . . . . .	194
2.3. “Dispersive” Approaches . . . . .	199
2.4. A Tale of Two Cities . . . . .	202
2.5. More Recent Developments . . . . .	204

3.	Pedagogical Introduction . . . . .	205
3.1.	Empirical Features of the Nuclear Force . . . . .	205
3.2.	The Idea of Massive-Particle Exchange . . . . .	209
3.3.	Field Theory, Perturbation Theory, and Feynman Diagrams . . . . .	210
3.4.	Various Boson Fields and their Role in $NN$ . . . . .	212
4.	The One-Boson Exchange Model . . . . .	220
4.1.	Covariant Equations . . . . .	220
4.2.	Meson Parameters and Two-Nucleon Properties . . . . .	225
5.	Advanced Meson Exchange Models . . . . .	235
5.1.	Models for the $2\pi$ Exchange . . . . .	235
5.2.	$\pi\rho$ Contributions . . . . .	239
5.3.	Other Two-Meson-Exchange Contributions . . . . .	244
5.4.	Results . . . . .	245
5.5.	Off-Shell Aspects . . . . .	247
6.	Charge Dependence . . . . .	253
6.1.	Introduction . . . . .	253
6.2.	Empirical Evidence . . . . .	254
6.3.	Some Results from Theory . . . . .	257
7.	Nucleon–Nucleon Scattering above the Inelastic Threshold . . . . .	265
7.1.	At Intermediate Energies . . . . .	265
7.2.	The GeV Region . . . . .	279
8.	Some Related Hadronic Interactions . . . . .	280
8.1.	Pion–Nucleon Scattering . . . . .	281
8.2.	The $NN$ Potential . . . . .	283
8.3.	Strange Nuclear Interactions . . . . .	287
9.	Nuclear Matter I—Conventional . . . . .	288
9.1.	Introduction . . . . .	289
9.2.	History of the Conventional Many-Body Problem . . . . .	291
9.3.	Conventional Theories . . . . .	292
9.4.	Results and Problems . . . . .	297
10.	Nuclear Matter II—Beyond Convention . . . . .	304
10.1.	Possible Extensions . . . . .	304
10.2.	Meson Degrees of Freedom . . . . .	310
10.3.	Isobar Degrees of Freedom . . . . .	318
10.4.	Many-Body Forces . . . . .	322
10.5.	Relativistic Effects . . . . .	328
11.	Finite Nuclei . . . . .	336
11.1.	The Three-Nucleon System . . . . .	336
11.2.	The Ground State of Closed-Shell Nuclei . . . . .	339
11.3.	Excited States . . . . .	340

12. Summary, Conclusions, and Outlook . . . . .	340
Acknowledgments . . . . .	342
Appendix A: One-Boson Exchange Potentials . . . . .	342
A.1. Interaction Lagrangians and OBE Amplitudes . . . . .	342
A.2. Relativistic Momentum Space OBEP . . . . .	345
A.3. Coordinate Space Potentials . . . . .	348
Appendix B: Models Including Isobar Degrees of Freedom . . . . .	351
Appendix C: Deuteron Wave Functions . . . . .	355
References . . . . .	363
