

## **Contents of Part A**

<b>CONTRIBUTORS TO PART A . . . . .</b>	<b>v</b>
<b>PREFACE . . . . .</b>	<b>vii</b>
<b>CONTRIBUTORS TO PART B . . . . .</b>	<b>xiii</b>
<b>CONTENTS OF PART B . . . . .</b>	<b>xv</b>
<b>INTRODUCTION . . . . .</b>	<b>xvii</b>
<b>By FAY AJZENBERG-SELOVE</b>	

### **I. The Spectroscopy of Charged Particles**

<b>I. A. The Interactions of Charged Particles with Matter . . . . .</b>	<b>3</b>
1. The Interaction of Nuclear Particles with Matter . . . . .	3
By WARD WHALING	
2. The Interaction of Beta Particles with Matter . . . . .	15
By C. S. WU	
<b>I. B. Charged-Particle Detectors . . . . .</b>	<b>31</b>
By N. S. WALL	
1. The Scintillation Counter . . . . .	32
2. Gaseous Ionization Detectors . . . . .	43
3. Other Charged-Particle Detection Techniques: Nuclear Emulsions, Bubble Chambers, Cloud Chambers, and Solid State Detectors . . . . .	51
<b>I. C. Measurement of Spectra . . . . .</b>	<b>55</b>
1. The Measurement of the Spectra of Charged Nuclear Particles . . . . .	55
By W. W. BUECHNER	
2. The Measurement of Beta-Ray Spectra . . . . .	70
By C. S. WU AND C. GEOFFRION	
<b>I. D. Charged Particle Reactions . . . . .</b>	<b>99</b>
By H. T. RICHARDS	
1. Experimental Methods . . . . .	101
2. Data Processing and Results . . . . .	126
<b>I. E. Radioactive Decay Schemes . . . . .</b>	<b>139</b>
1. The Study of Nuclear States Observed in Beta Decay . . . . .	139
By C. S. WU	
2. The Study of Nuclear States Observed in Alpha Decay . . . . .	170
By F. S. STEPHENS	

**II. Gamma Ray Spectroscopy**

<b>II. A. The Interaction of Gamma Rays with Matter . . . . .</b>	<b>211</b>
By WILLIAM F. HORNYAK	
1. Introduction . . . . .	211
2. Photoelectric Effect . . . . .	213
3. Compton Effect . . . . .	219
4. Pair Production Effect . . . . .	224
5. Particular Mass Attenuation Coefficients . . . . .	227
<b>II. B. The Detection of Gamma Rays and the Measurement of Gamma-Ray Spectra . . . . .</b>	<b>228</b>
By D. E. ALBURGER	
1. The Ionization Chamber, Proportional Counter, and Geiger-Müller Counter . . . . .	229
2. Scintillation Counters and Techniques . . . . .	230
3. Magnetic Gamma-Ray Spectrometers for Photo or Internal-Conversion Electrons . . . . .	234
4. Magnetic Pair Spectrometers . . . . .	239
5. Crystal Diffraction Spectroscopy . . . . .	242
<b>II. C. The Study of Nuclear States . . . . .</b>	<b>245</b>
1. The Gamma Decay of Bound Nuclear States . . . . .	246
By D. E. ALBURGER	
2. Gamma Rays from Unbound Nuclear States Formed by Charged-Particle Capture . . . . .	260
By H. E. GOVE AND A. E. LITHERLAND	
3. Neutron-Capture Gamma Rays . . . . .	304
By G. A. BARTHOLOMEW	

**III. Neutron Spectroscopy**

<b>III. A. The Interactions of Neutrons with Matter . . . . .</b>	<b>335</b>
By W. SELOVE	
1. General Characteristics of Cross-Section Variation with Energy . . . . .	336
2. Types of Interactions . . . . .	336
<b>III. B. Techniques of Slow Neutron Spectroscopy . . . . .</b>	<b>342</b>
By L. M. BOLLINGER	
1. Neutron Spectrometers . . . . .	343
2. Techniques of Measuring Neutron Cross Sections . . . . .	350
<b>III. C. Measurement of Fast Neutron Spectra . . . . .</b>	<b>358</b>
By L. CRANBERG AND L. ROSEN	
1. Gas Counters . . . . .	360
2. Scintillators . . . . .	363
3. Counter Telescopes . . . . .	365
4. Time-of-Flight . . . . .	369

5. Bubble Chambers . . . . .	375
6. Cloud Chambers . . . . .	379
7. Nuclear Emulsions . . . . .	380
III. D. The Study of Bound Nuclear States . . . . . By L. CRANBERG AND L. ROSEN	399
1. Discrete Spectra . . . . .	400
2. Continuous Spectra . . . . .	401
3. Experimental Procedures . . . . .	405
4. Cross-Section Determinations . . . . .	412
III. E. The Study of Unbound Nuclear States . . . . . 1. Slow Neutron Resonances . . . . . By L. M. BOLLINGER	416
2. Fast Neutron Resonances . . . . . By H. H. BARSCHALL	417
III. F. The Neutron Threshold Method . . . . . By T. W. BONNER	477
1. Neutron Thresholds in Endothermic Reactions . . . . .	477
2. Neutron Thresholds Leading to Excited States of Nuclei . . . . .	479
IV. Other Topics	
IV. A. Photonuclear Reactions . . . . . By WILLIAM E. STEPHENS	491
1. Elastic Scattering of Photons by Nuclei . . . . .	492
2. Photon Total Absorption . . . . .	496
3. Photoactivation . . . . .	497
4. Photoneutrons . . . . .	501
5. Photoprottons . . . . .	505
6. Photoalphas . . . . .	508
IV. B. The Measurement of Very Short Lifetimes . . . . . By S. DEVONS	512
1. Experimental Methods for Determination of Lifetimes . . . . .	517
2. Measurement of Widths of Gamma-Radiating Levels . . . . .	533
3. Experimental Results . . . . .	545
IV. C. The Measurement of Electromagnetic Moments of Nuclear States . . . . . By H. FRAUENFELDER AND R. M. STEFFEN	548
1. Nuclear Moments and Nuclear Models . . . . .	550
2. Interaction of Nuclear Moments with External Fields . . . . .	554
3. Conventional Methods . . . . .	557
4. Methods Based on the Emission of Nuclear Radiations . . . . .	562
AUTHOR INDEX (PART A) . . . . .	583
SUBJECT INDEX (PART A) . . . . .	604
