

## CONTENTS

	Page
CHAPTER IV. INTERACTIONS INVOLVING THREE SECONDARY PARTICLES	78
13. Limiting Relationships	78
14. Energy Spectra of Secondary Particles	83
CHAPTER V. MULTIPLE PROCESSES	87
15. Limiting Relationships	87
16. Angular and Energy Distributions for Multiple Processes	93
17. Determination of the Energy of Fast Nucleons	101
PART TWO	
Q U A N T U M    T H E O R Y	
CHAPTER VI. THE SCATTERING MATRIX AND ITS PROPERTIES	111
18. The S-matrix	111
19. Unitarity of the S-matrix	114
20. Constants of Motion	116
21. Time Reversal	118
22. Transformation Functions	124
23. Relationship between S-matrix and Effective Cross-section	127
CHAPTER VII. APPLICATIONS OF THE GENERAL THEORY OF THE S-MATRIX	132
24. Relationship between Effective Cross-section of Elastic and Inelastic Processes	132
25. Relationship between Effective Cross-section of Direct and Inverse Reactions	141
CHAPTER VIII. COLLISION OF PARTICLES POSSESSING SPIN	144
26. Statement of the Problem. Examples. Determination of the Parameters of the S-matrix	144
27. Vector Addition Coefficients	150
28. Some Examples	154
29. The Coefficients $W$ , $X$ , $Z$ and $Z_{\gamma}$	158

## CONTENTS

	Page
CHAPTER VIII (contd.)	
30. Angular Distributions in Nuclear Reactions (Cases when the Particles have Non-vanishing Rest Mass)	165
CHAPTER IX. POLARIZATION OF PARTICLES IN NUCLEAR REACTIONS	172
31. General Formulae	172
32. Fundamental Laws Related to Polarization in Nuclear Reactions	177
CHAPTER X. REACTIONS INVOLVING PHOTONS	180
33. General Formulae	180
34. Relationship Between Photoproduction Processes, Scattering of $\pi$ -mesons and the Compton Effect by a Nucleon	188
Appendix I (To Part One)	195
Appendix II (To Part Two)	224
References	299
