

# Contents

<b>1. Introduction</b>	1
1.1 General Considerations	1
1.2 Kinematics of Ion-Ion Collisions	2
1.3 Scattering and Reaction Cross Sections: Simple Formalism	9
1.4 Strong Absorption Models of Heavy-Ion Scattering	15
References Chapter 1	23
<b>2. Light Scattering Systems</b>	25
2.1 Introduction and Historical Survey	25
2.2 Gross Structure in Elastic Scattering and the Nucleus-Nucleus Interaction	33
2.3 Intermediate Structure and the Nuclear Molecule	49
2.4 Anomalous Backscattering and Elastic Transfer	60
References Chapter 2	66
<b>3. Quasi-Elastic Scattering from Heavier Target Nuclei</b>	71
3.1 Coulomb Excitation	71
3.2 Distortion and Break-Up in the Coulomb Field	85
3.3 Elastic Scattering and Reaction Cross Sections	97
3.4 Inelastic Scattering Near and Above the Coulomb Barrier	114
References Chapter 3	129
<b>4. General Aspects of Nucleon Transfer</b>	133
4.1 Introduction	133
4.2 Semiclassical Considerations and the Structure of Quasi-Elastic Angular Distributions	139
4.3 Selectivity Due to Kinematic Conditions	147
References Chapter 4	160

<b>5. Quasi-Elastic Transfer Reactions</b> . . . . .	163
5.1 Formal Description I: Spectroscopic Aspects . . . . .	163
5.2 Formal Description II: Transfer Amplitudes . . . . .	169
5.3 Sub-Coulomb Transfer . . . . .	180
5.4 One-Nucleon Transfer Above the Coulomb Barrier . . . . .	189
5.5 Multi-Nucleon Transfer . . . . .	198
References Chapter 5 . . . . .	208
<b>6. Deep-Inelastic Scattering and Transfer</b> . . . . .	213
6.1 Introduction . . . . .	213
6.2 Gross Features of Deep-Inelastic Collisions . . . . .	222
6.3 Detailed Studies . . . . .	239
6.4 Models of Deep-Inelastic Collisions . . . . .	259
References Chapter 6 . . . . .	279
<b>7. Complete Fusion</b> . . . . .	283
7.1 General Considerations . . . . .	283
7.2 Sub-Barrier Fusion . . . . .	289
7.3 Fusion Above the Barrier: Experimental Evidence . . . . .	304
7.4 Fusion Above the Barrier: Models and Limitations . . . . .	318
7.5 Superheavy Elements . . . . .	340
References Chapter 7 . . . . .	349
<b>8. Compound-Nucleus Decay</b> . . . . .	353
8.1 General Aspects . . . . .	353
8.2 Statistical Theory . . . . .	357
8.3 Competition Between Neutron and Gamma-Ray Emission . . . . .	369
8.4 Competition Between Different Particle Channels . . . . .	377
8.5 Competition Between Fission and Light-Particle Emission . . . . .	383
References Chapter 8 . . . . .	389
<b>Appendices</b> . . . . .	393
A: Glossary of Symbols . . . . .	393
B: Nonrelativistic Two-Body Kinematics . . . . .	401
C: Coulomb Scattering . . . . .	403
D: List of Conference Proceedings . . . . .	404
<b>Subject Index</b> . . . . .	405
