CONTENTS OF OTHER VOLUMES

xi

Quantum Theory and Elementary Particles

Victor F. Weisskopf

I. Introduction	1
II. Quantum Mechanics and "Permanent Particles"	3
III. The Baryon	4
IV. The Boson Spectrum	7
V. Baryons Guarantee Stability	9
VI. SU(3) Symmetry	11
VII. SU(6) Symmetry	14
VIII. The Question of the Electron	16
IX. Weak Interactions	16
X. Summary	17
References	19

Nucleon-Nucleon Scattering

G. Breit and R. D. Haracz

I. Introduction	21
II. Phase Shifts	29
III. The Scattering Matrix	50
IV. Measured Quantities and Their Calculation	61
V. Relativistic Effects	79
VI. One Pion Exchange	88
VII. Phenomenological Search Procedures	101
VIII. Results of Phenomenological Searches	116
IX. Charge Independence and Form of the OPEP	150
X. Supplementary Remarks	163
List of Symbols	169
References	172
Supplementary References Added in Proof	184

Pion-Nucleon Interactions

J. Hamilton

Introduction	194
I. Basic Properties of the Pion	195
II. Analysis of <i>P</i> -Wave Pion-Nucleon Scattering	208
III. Analysis of <i>S</i> -Wave Pion-Nucleon Scattering	254
IV. Prediction of Pion-Nucleon Scattering	284
References	336
Bibliography	338

Electromagnetic Form Factors

T. A. Griffy and L. I. Schiff

I. Introduction	341
II. Theory of Elastic Electron-Nucleon Scattering	345
III. Derivation of Nucleon Electromagnetic Form Factors from Electron Scattering Measurements	353
IV. Calculations of the Nuclear Form Factors	375
V. Electroproduction of Pions	384
References	388

Unitary Symmetry

P. T. Matthews

Introduction	392
I. Invariance and Unitary Transformations	392
II. Baryon Conservation— $U(1)$	394
III. Isotopic Spin— $SU(2)$	395
IV. Hypercharge and $SU(3)$	406
V. Space-Time and $SU(6)$	428
VI. Lorentz Invariance	435
VII. Covariance and $U(6,6)$	445
Appendix A. Groups and Transformations	461
Appendix B. Multiplets and Products	477
Note Added in Proof	479
References	480
 A U T H O R I N D E X	483
S U B J E C T I N D E X	494
