The Elementary Particles with Strong Interactions

PART 1: THE BARYON SYSTEMS

Donald H. Miller

I. Introduction	1
II. Definitions and Kinematics	3
III. Two-Body Final States	6
IV. Strong Production and Decay Processes	21
V. Classification and Nomenclature for Resonant States	28
VI. The $S = 0$ Baryon Systems	31
VII. The $S = 1$ Baryon Systems	55
VIII. The $S = -2$ Baryon Systems	85
IX. Baryons with $S = -3$	91
X. Possible Resonances in Other Systems	93
XI. Summary	101
References	104

The Elementary Particles with Strong Interactions

PART 2: THE MESON SYSTEMS

Donald H. Miller

I. Phenomenological Analysis	112
II. The Nonet of Pseudoscalar Mesons	123
II. The Nonet of Vector Mesons	135
IV. The Nonet of Spin-Two Mesons	159
V. The SU(3) Classification of the Known Nonets and the Quark Model	173
VI. Evidence for Other $S = 0$ Meson Systems	176
VII. Evidence for Other $S = \pm 1$ Meson Systems	214
VIII. Summary	225
References	228

Antinucleon-Nucleon Interactions***R. Armenteros and B. French***

I. Introduction	237
II. Total Antinucleon-Nucleon Cross Section and Elastic Scattering	238
III. Inelastic Scattering without Annihilation	249
IV. Antinucleon-Nucleon Annihilations	277
V. Angular Correlations	396
VI. Theoretical Ideas about Annihilation Processes	409
References	411
 AUTHOR INDEX	419
SUBJECT INDEX	436
