| <i>Contents of Other Parts</i> | xiii |

## VII GAMMA-RAY SPECTROSCOPY

### VII.A Coulomb Excitation

*F. K. McGowan and P. H. Stelson*

|   |    |
|---|----|
| I. Introduction   | 4  |
| II. Relevant Aspects of the Theory of Coulomb Excitation            | 13 |
| III. Gamma-Ray Spectroscopy   | 20 |
| IV. Direct E2 and E3 Coulomb Excitation with Light Ions             | 27 |
| V. Direct Gamma-Ray Spectra from Coulomb Excitation with Heavy Ions | 34 |
| VI. Gamma-Ray Coincidence Spectroscopy                              | 38 |
| VII. Particle-Gamma Coincidence Spectroscopy                        | 42 |
| References  | 51 |

### VII.B Coulomb Reorientation

*O. Häusser*

|  |    |
|--|----|
| I. Introduction  | 55 |
| II. Methods for Measuring Quadrupole Moments of Excited States | 60 |
| III. Theoretical Considerations in Coulomb Reorientation       | 63 |
| IV. Experimental Methods in Coulomb Reorientation              | 75 |
| V. Results and Discussion                                      | 84 |
| References   | 89 |

**VII.C Magnetic Moments of Excited States***E. Recknagel*

|   |     |
|---|-----|
| I. Introduction   | 93  |
| II. Hyperfine Interaction and Perturbed Angular Correlations  | 95  |
| III. Methods for Measuring Magnetic Moments of Excited States | 98  |
| IV. Results and Discussion                                    | 122 |
| References  | 139 |

**VII.D Gamma Rays from Capture Reactions***C. Rolfs and A. E. Litherland*

|   |     |
|---|-----|
| I. Introduction                                   | 143 |
| II. Accelerator Properties and Energy Calibration | 146 |
| III. Gamma-Ray Spectrometers                      | 148 |
| IV. Targets                                       | 153 |
| V. Yield Curves                                   | 160 |
| VI. Miscellaneous Topics                          | 175 |
| References  | 181 |

**VII.E Gamma Rays from Heavy-Ion Reactions***J. O. Newton*

|  |     |
|--|-----|
| I. Introduction  | 185 |
| II. Qualitative Outline of Theory                          | 188 |
| III. Experimental Methods                                  | 214 |
| IV. Nuclear Structure Information from Heavy-Ion Reactions | 218 |
| References   | 225 |

**VII.F Detailed Spectroscopy from Fission***E. Cheifetz and J. B. Wilhelmy*

|   |     |
|---|-----|
| I. Introduction                             | 230 |
| II. Spectroscopy of Prompt Fission Products | 233 |
| III. Post-Beta-Decay Spectroscopy           | 249 |
| IV. Nuclear Properties of Fission Products  | 258 |
| V. Summary                                  | 271 |
| References                                  | 272 |

**VII.G Angular Correlation Methods***A. J. Ferguson*

|                                      |     |
|--------------------------------------|-----|
| I. Introduction                      | 277 |
| II. Some Particular Techniques       | 291 |
| III. Perturbations in Vacuum Recoils | 299 |
| IV. Optimization                     | 300 |
| References                           | 305 |

**VII.H Lifetime Measurements***D. B. Fossan and E. K. Warburton*

|  |     |
|--|-----|
| I. Introduction  | 307 |
| II. Sensitivity of Lifetime Results to Nuclear Structure | 310 |
| III. Electronic Timing Techniques                        | 316 |
| IV. Doppler Shift Techniques                             | 339 |
| V. Miscellaneous Timing Techniques                       | 367 |
| References   | 370 |

**VIII OTHER TOPICS****VIII.A Photonuclear Reactions***B. L. Berman*

|  |     |
|--|-----|
| I. Photonuclear Techniques                             | 377 |
| II. Giant Resonance Studies                            | 388 |
| III. Photonuclear Studies near the Particle Thresholds | 402 |
| IV. Summary  | 410 |
| References   | 410 |

**VIII.B Nuclear Spectroscopy from Delayed Particle Emission***J. C. Hardy*

|                      |     |
|----------------------|-----|
| I. Introduction      | 417 |
| II. The Phenomena    | 419 |
| III. The Experiments | 435 |
| IV. The Consequences | 441 |
| References           | 463 |

**VIII.C In-Beam Atomic Spectroscopy***Indrek Martinson*

|   |     |
|---|-----|
| I. Introduction   | 467 |
| II. Results: Atomic Energy Levels                           | 480 |
| III. Results: Atomic Lifetimes and Transition Probabilities | 484 |
| IV. Astrophysical Consequences of Lifetime Measurements     | 494 |
| V. Results: Atomic Fine Structure                           | 498 |
| VI. Foil-Excitation Mechanisms                              | 506 |
| References  | 508 |

**VIII.D Effects of Extranuclear Fields on Nuclear Radiations***D. A. Shirley*

|  |     |
|--|-----|
| I. Introduction                              | 513 |
| II. The Hyperfine Hamiltonian                | 514 |
| III. Mössbauer Spectroscopy                  | 528 |
| IV. Comparison of Inner-Shell Spectroscopies | 536 |
| V. Radiations from Oriented Nuclear States   | 538 |
| References                                   | 548 |

**VIII.E A Guide to Nuclear Compilations** 551*F. Ajzenberg-Selove*

|                      |     |
|----------------------|-----|
