

CONTENTS

	Page
§ 1. Introduction	1
§ 2. The semi-empirical formulae of von Weizsäcker and of Bethe and Bacher	1
§ 3. Fermi's semi-empirical formula	3
§ 4. Cameron's semi-empirical formula	5
§ 5. The allowance for the effect of shells	8
§ 6. The allowance for the effect of shells and for the parity of Z and N by Cameron's method	10
§ 7. Levy's empirical formula	18
§ 8. Systematics of β -decay energies: the Levy network	21
§ 9. Systematics of β -decay energies: the Cameron network	24
§ 10. Experimental and theoretical values of β -decay energies	49
§ 11. Cases of large discrepancy	49
