

CONTENTS

Editor's Foreword	v
Preface	vii
1. Introduction	
1-1 Resonance fluorescence	1
1-2 Cross section for resonance processes	7
1-3 Mössbauer's discovery	11
1-4 Literature and reprints	13
2. Theory	
2-1 Preliminary remarks	14
2-2 Lattice vibrations	15
2-3 The classical theory	17
2-4 The physical picture	20
2-5 Sketch of the theory	26
3. Experimental Apparatus and Problems	
3-1 Survey	33
3-2 Isotopes	36
3-3 Sources and absorbers	39
3-4 Apparatus	40

3-5	Corrections	44
3-6	Useful information	47
4. Nuclear Properties		
4-1	Introduction	50
4-2	Lifetime and conversion coefficient	51
4-3	Nuclear moments	51
4-4	Isomeric shifts	53
4-5	Parity experiments	57
5. General Physics		
5-1	Survey	58
5-2	Gravitational red shift	58
5-3	Accelerated systems	62
5-4	Second-order Doppler shift	63
5-5	Frequency and phase modulation	65
5-6	The uncertainty relation between energy and time	66
5-7	Recoilless Rayleigh scattering	69
5-8	Coherence and interference	71
5-9	Polarization	73
6. Solid-State Physics		
6-1	Survey	76
6-2	Lattice properties	78
6-3	Internal fields	82
6-4	Impurities and imperfections	83
6-5	Low temperatures	84
7. Bibliography on the Mössbauer Effect		
7-1	Review articles	86
7-2	Research papers	87
7-3	Conference reports	96

Reprints and Translations

Section 1

- The Effect of Collisions upon the Doppler Width of Spectral Lines, by R. H. Dicke ● *Phys. Rev.*, **89**, 472 (1953) 99
- Kernresonanzfluoreszenz von Gammastrahlung in Ir¹⁹¹, by R. L. Mössbauer ● *Z. Physik*, **151**, 124 (1958) 101
- Theoretical part of the preceding paper in English translation 121
- Kernresonanzabsorption von γ -Strahlung in Ir¹⁹¹, by R. L. Mössbauer ● *Naturwissenschaften*, **45**, 538 (1958) (English translation) 127
- Kernresonanzabsorption von γ -Strahlung in Ir¹⁹¹, by R. L. Mössbauer ● *Z. Naturforsch.*, **14a**, 211 (1959) 130
- Capture of Neutrons by Atoms in a Crystal, by W. E. Lamb, Jr. ● *Phys. Rev.*, **55**, 190 (1939) 136

Section 2

- Study of Lattice Vibrations by Resonance Absorption of Nuclear Gamma Rays, by W. M. Visscher ● *Ann. Phys.*, **9**, 194 (1960) 144
- Some Simple Features of the Mössbauer Effect, by H. J. Lipkin ● *Ann. Phys.*, **9**, 332 (1960) 161
- Resonance Radiation of Nuclei Bound in a Lattice, by D. R. Inglis (original paper) 169
- Resonance Absorption of Nuclear Gamma Rays and the Dynamics of Atomic Motions, by K. S. Singwi and A. Sjölander ● *Phys. Rev.*, **120**, 1093 (1960) 194
- Diffusion des photons sur les atomes et les noyaux dans les cristaux, by C. Tzara ● *J. phys. radium*, **22**, 303 (1961) 204

Section 3

- Diffusion résonante du rayonnement γ de 23.8 kev de Sn¹¹⁹ émis sans recul, by R. Barloutaud, J. L. Picou, and C. Tzara ● *Compt. rend.*, **250**, 2705 (1960) 209
- Zeeman Effect in the Recoilless γ -Ray Resonance of Zn⁶⁷, by P. P. Craig, D. E. Nagle, and D. R. F. Cochran ● *Phys. Rev. Letters*, **4**, 561 (1960) 212
- Mössbauer Effect in Ferrocyanide, by S. L. Ruby, L. M. Epstein, and K. H. Sun ● *Rev. Sci. Instr.*, **31**, 580 (1960) 216

Transmission and Line Broadening of Resonance Radiation Incident on a Resonance Absorber, by S. Margulies and J. R. Ehrman • Nuclear Instr. and Methods, 12, 131 (1961)	218
Section 4	
Polarized Spectra and Hyperfine Structure in Fe ⁵⁷ , by S. S. Hanna, J. Heberle, C. Littlejohn, G. J. Perlow, R. S. Preston, and D. H. Vincent • Phys. Rev. Letters, 4, 177 (1960)	225
Evidence for Quadrupole Interaction of Fe ^{57m} and Influence of Chemical Binding on Nuclear Gamma-Ray Energy, by O. C. Kistner and A. W. Sunyar • Phys. Rev. Letters, 4, 412 (1960)	229
Electric Quadrupole Splitting and the Nuclear Volume Effect in the Ions of Fe ⁵⁷ , by S. DeBenedetti, G. Lang, and R. Ingalls • Phys. Rev. Letters, 6, 60 (1961)	233
Interpretation of the Fe ⁵⁷ Isomer Shift, by L. R. Walker, G. K. Wertheim, and V. Jaccarino • Phys. Rev. Letters, 6, 98 (1961)	236
Section 5	
Apparent Weight of Photons, by R. V. Pound and G. A. Rebka, Jr. • Phys. Rev. Letters, 4, 337 (1960)	240
Measurement of the Red Shift in an Accelerated System Using the Mössbauer Effect in Fe ⁵⁷ , by H. J. Hay, J. P. Schiffer, T. E. Cranshaw, and P. A. Egelstaff • Phys. Rev. Letters, 4, 165 (1960)	245
Absence of Doppler Shift for Gamma Ray Source and Detector on Same Circular Orbit, by D. C. Champeney and P. B. Moon • Proc. Phys. Soc. (London), 77, 350 (1961)	247
Variation with Temperature of the Energy of Recoil-free Gamma Rays from Solids, by R. V. Pound and G. A. Rebka, Jr. • Phys. Rev. Letters, 4, 274 (1960)	250
Temperature-Dependent Shift of γ Rays Emitted by a Solid, by B. D. Josephson • Phys. Rev. Letters, 4, 341 (1960)	252
Acoustically Modulated γ Rays from Fe ⁵⁷ , by S. L. Ruby and D. I. Bolef • Phys. Rev. Letters, 5, 5 (1960)	253

Measurement of the Refractive Index of Lucite by Recoilless Resonance Absorption, by L. Grodzins and E. A. Phillips • Phys. Rev., 124, 774 (1961)	256
Time Dependence of Resonantly Filtered Gamma Rays from Fe ⁵⁷ , by F. J. Lynch, R. E. Holland, and M. Hamermesh • Phys. Rev., 120, 513 (1960)	259
Effect of Radiofrequency Resonance on the Natural Line Form, by M. N. Hack and M. Hamermesh • Nuovo cimento, 19, 546 (1961)	267
Recoilless Rayleigh Scattering in Solids, by C. Tzara and R. Barloutaud • Phys. Rev. Letters, 4, 405 (1960)	279
Sur la possibilité de mettre en évidence la cohérence de phase dans la diffusion de résonance des rayons γ par des noyaux atomiques, by A. Kastler • Compt. rend., 250, 509 (1960)	281
Resonant Scattering of the 14-keV Iron-57 γ -Ray and Its Interference with Rayleigh Scattering, by P. J. Black and P. B. Moon • Nature, 188, 481 (1960)	284
Section 6	
The Mössbauer Effect in Tin from 120°K to the Melting Point, by A. J. F. Boyle, D. St. P. Bunbury, C. Edwards, and H. E. Hall • Proc. Phys. Soc. (London), 77, 129 (1961)	288
Mössbauer Effect: Applications to Magnetism, by G. K. Wertheim • J. Appl. Phys., Suppl., 32, No. 3, 110S (1961)	295
Direction of the Effective Magnetic Field at the Nucleus in Ferromagnetic Iron, by S. S. Hanna, J. Heberle, G. J. Perlow, R. S. Preston, and D. H. Vincent • Phys. Rev. Letters, 4, 513 (1960)	303
Temperature Dependence of the Internal Field in Ferromagnets, by D. E. Nagle, H. Frauenfelder, R. D. Taylor, D. R. F. Cochran, and B. T. Matthias • Phys. Rev. Letters, 5, 364 (1960)	306
Polarization of the Conduction Electrons in the Ferromagnetic Metals, by A. J. F. Boyle, D. St. P. Bunbury, and C. Edwards • Phys. Rev. Letters, 5, 553 (1960)	308
Hyperfine Field and Atomic Moment of Iron in Ferromagnetic Alloys, by C. E. Johnson, M. S. Ridout, T. E. Cranshaw, and P. E. Madsen • Phys. Rev. Letters, 6, 450 (1961)	312

Internal Magnetic Fields in Manganese-Tin Alloys, by L. Meyer-Schützmeister, R. S. Preston, and S. S. Hanna • Phys. Rev., 122, 1717 (1961)	314
Study of the Internal Fields Acting on Iron Nuclei in Iron Garnets, Using the Recoil-free Absorption in Fe^{57} of the 14.4-keV Gamma Radiation from $\text{Fe}^{57\text{m}}$, by R. Bauminger, S. G. Cohen, A. Marinov, and S. Ofer • Phys. Rev., 122, 743 (1961)	318
On the Use of the Mössbauer Effect for Studying Localized Oscillations of Atoms in Solids, by S. V. Maleev • JETP, 39, 891 (1960) (in Russian); Soviet Physics JETP, 12, 617 (1961) (in English). English transla- tion reprinted here	324
Polarization of Co^{57} in Fe Metal, by J. G. Dash, R. D. Taylor, D. E. Nagle, P. P. Craig, and W. M. Visscher • Phys. Rev., 122, 1116 (1961)	325
Comments and Corrections	335
