Contents

	Preface	v
I.	Introduction	1
II.	Effective Range Theory of S-Wave Scattering, and the N/D Method	5
III.	The Ambiguity of Castillejo, Dalitz, and Dyson, and Levinson's Theorem	29
IV.	The Mandelstam Representation for Non-Relativistic Potential Scattering	41
V.	Mandelstam Representation for Relativistic Scattering	54
VI.	The Generalized Potential	73
VII.	Approximations to the Mandelstam Representation: Polology and Nearby Cuts	79
VIII.	The Strip Approximation	89
IX.	Asymptotic Behavior of Amplitudes	94
X.	Regge Poles in Non-Relativistic Scattering	99
XI.	Regge Poles of the Coulomb Scattering Amplitude	119
XII.	More About Regge Poles	129
XIII.	Regge Poles in Relativistic Scattering	144
XIV.	Some Experimental Results at High Energies	154
XV.	Regge Poles and High Energy Experiments	161
XVI.	Are All Strongly Interacting Particles Composite?	175
	Addendum I: The Khuri-Jones Threshold Factor	183
	Addendum II: The Possibility of Regge Cuts	185
	References	193
	Index	199
