

CONTENTS

Preface	v
The Confinement-Deconfinement Mechanism <i>J. Polonyi</i>	1
Simulating the Quark-Gluon Plasma on the Lattice <i>F. Karsch</i>	61
Quark-Gluon Transport Theory <i>H.-T. Elze and U. Heinz</i>	117
Applications of Transport Theory to Quark-Gluon Plasma <i>S. Mrówczyński</i>	185
Non-Equilibrium Aspects of Ultrarelativistic Nuclear Collisions <i>M. Gyulassy</i>	223
Color Tube Model of Quark-Gluon Plasma Formation in High Energy Nucleus-Nucleus Collisions <i>A. Bialas and W. Czyz</i>	271
Hadronic Matter in the String Model <i>K. Sailer, W. Greiner, and B. Mueller</i>	299
Hydrodynamics of Quark-Gluon Plasmas <i>J.-P. Blaizot and J.-Y. Ollitrault</i>	393
Hadronization of a Quark-Gluon Plasma <i>U. Heinz, K. S. Lee, and E. Schnedermann</i>	471
Dilepton Emission in Relativistic Nuclear Collisions <i>P. V. Ruuskanen</i>	519
Quark-Gluon Plasma Formation and Strangeness Evolution <i>P. Koch</i>	555

Colour Screening and Quark Deconfinement in Nuclear Collisions <i>H. Satz</i>	593
J/ψ Suppression, Signal of a Quark-Gluon Plasma? <i>J.-P. Blaizot and J.-Y. Ollitrault</i>	631
Self-Similarity in Multiplicity Fluctuations <i>R. C. Hwa</i>	665
