

## CONTENTS

<i>Editors' Introduction</i>	<i>vii</i>
<i>Translator's Preface</i>	<i>ix</i>
<i>Preface</i>	<i>xi</i>
<i>Introduction</i>	<i>xiii</i>
<b>CHAPTER I - THE PRINCIPLE OF OPERATION OF THE MICROTRON AND TYPES OF MICROTRONS</b>	
Section 1 - Introductory Remarks	1
Section 2 - The Principle of Operation of the Microtron	2
Section 3 - Particle Injection	6
Section 4 - Types of Microtrons. Uses of Microtrons	12
Section 5 - The Positron Microtron	20
<b>CHAPTER II - PHASE MOTION IN THE MICROTRON</b>	
Section 1 - Small Phase Oscillations	23
Section 2 - Numerical Calculations of Nonlinear Phase Oscillations	32
Section 3 - Conditions of Capture and Resonance Acceleration of Particles	35
Section 4 - The Dependence of Phase Motion on the Thickness of the Accelerating Cavity	39
<b>CHAPTER III - PARTICLE INJECTION CALCULATIONS</b>	
Section 1 - Conditions for Injection	44
Section 2 - Equations of Motion	46
Section 3 - Methods of Numerical Calculations	49
Section 4 - Calculations for the First Type of Acceleration	52
Section 5 - Calculations for the Second Type of Acceleration	57
Section 6 - Microtron Efficiency and Means of Increasing It	61
<b>CHAPTER IV - PARTICLE FOCUSING</b>	
Section 1 - Vertical and Radial Motion	67
Section 2 - Calculations for Vertical Focusing	72
Section 3 - Calculations for Radial Focusing	78
Section 4 - Analysis of Vertical and Radial Motion	83
Section 5 - Particle Motion in a Slightly Nonuniform Magnetic Field	91

<b>CHAPTER V - CONSTRUCTION OF A MICROTRON</b>	
Section 1 - General Remarks	99
Section 2 - The Microtron Magnet	99
Section 3 - The Microtron Cavity	107
Section 4 - Electron Source	112
Section 5 - Beam Extraction	115
Section 6 - The Accelerator Chamber and the Vacuum System	117
Section 7 - High Frequency Generators and Amplifiers and Design of the Waveguide System	119
Section 8 - The Microwave System of the Microtron	124
Section 9 - Power Supply and Control Systems	126
<b>CHAPTER VI - PHYSICAL CHARACTERISTICS OF THE MICROTRON</b>	
Section 1 - The Power Needed by the Cavity, and Its Matching to the Waveguide	131
Section 2 - Microtron Efficiency	134
Section 3 - Choice of the Frequency for the Microtron	138
Section 4 - Conditions of Similarity for a Microtron	140
Section 5 - Beam-Cavity Interaction	141
Section 6 - Coherent Radiation of the Bunches and the Limiting Current in the Microtron	147
<b>CHAPTER VII - EXPERIMENTAL STUDY OF THE MICROTRON</b>	
Section 1 - Power Measurement in the Cavity and the Current of Accelerated Electrons	151
Section 2 - The Structure of the Electron Bunches	155
Section 3 - Methods for Analyzing the Focusing	160
Section 4 - Results of the Experimental Investigation of Focusing	162
Section 5 - The Use of Accelerated Electrons for Obtaining Gamma Radiation and Neutrons	175
<b>CHAPTER VIII - CONTINUOUS WAVE MICROTRON</b>	
Section 1 - On Transition to a Continuous Wave Mode	180
Section 2 - Energy Characteristics of a Continuous Wave Microtron	181
Section 3 - Construction of a Continuous Wave Microtron and the Possibilities Thereof	184
<b>CONCLUSION</b>	187
<b>APPENDIX I - DESIGNING THE MICROTRON</b>	190
<b>II - MOTION CHARACTERISTICS AS EXPRESSED BY A SECOND ORDER MATRIX</b>	195
