### Part I. TECHNIQUES

<b>Section I.</b>	<b>Neutron Sources.....</b>	1
I.A.	Radioactive Neutron Sources <i>By A. O. Hanson.....</i>	3
I.B.	Kinematics of Neutron-Producing Reactions <i>By J. Monahan.....</i>	49
I.C.	Monoenergetic Neutron Sources: Reactions with Light Nuclei <i>By J. E. Brolley, Jr. and J. L. Fowler.....</i>	73
I.D.	Monoenergetic Neutron Sources: Reactions with Medium-Weight Nuclei <i>By Jerry B. Marion.....</i>	113
I.E.	The Li <sup>7</sup> ( <i>p, n</i> )Be <sup>7</sup> Reaction <i>By J. H. Gibbons and Henry W. Newson.....</i>	133
<b>Section II.</b>	<b>Recoil Detection Methods.....</b>	177
II.A.	Gas Recoil Counters <i>By A. T. G. Ferguson.....</i>	179
II.B.	Recoil Detection in Scintillators <i>By C. D. Swartz and George E. Owen.....</i>	211
II.C.	Recoil Telescope Detectors <i>By C. H. Johnson.....</i>	247
II.D.	Photographic Plate Detection <i>By R. Stephen White.....</i>	297
II.E.	Cloud Chamber Detection <i>By William E. Stephens and H. Staub.....</i>	335
<b>Section III.</b>	<b>Detection by Neutron-Induced Methods.....</b>	359
III.A.	Flat Response Counters <i>By W. D. Allen.....</i>	361
III.B.	Neutron Detection by Reactions Induced in Scintillators <i>By C. O. Muehlhause.....</i>	387
III.C.	Helium-3 Neutron Spectrometers <i>By R. Batchelor and G. C. Morrison.....</i>	413
III.D.	Gaseous Scintillation Detectors <i>By Charles M. Huddleston.....</i>	441
III.E.	Fission Detectors <i>By R. W. Lamphere.....</i>	449

<b>Section IV. Special Techniques and Problems.....</b>	<b>507</b>
IV.A. Time-of Flight Techniques <i>By J. H. Neilei and W. M. Good.....</i>	509
IV.B. Neutron Flux Measurements <i>By Joseph E. Perry, Jr.....</i>	623
IV.C. Radioactivation Methods of Determining Neutron Flux <i>By Paul R. Byerly, Jr.....</i>	657
IV.D. Targets for the Production of Neutrons <i>By J. H. Coon.....</i>	677
IV.E. Neutron Collimation and Shielding for Experimental Purposes <i>By Alexander Langsdorf, Jr.....</i>	721
IV.F. Laboratory Shielding <i>By C. F. Cook and T. R. Strayhorn.....</i>	807
IV.G. Fast Neutron Dosimetry <i>By G. S. Hurst.....</i>	823
IV.H. Fast Neutron Radiation Hazards <i>By William T. Ham, Jr.....</i>	841
IV.I. Computer Techniques <i>By Harvey J. Amster, Edward J. Leshan, and Martin Walt.</i>	929
<b>Index.....</b>	<b>961</b>

## Part II. EXPERIMENTS AND THEORY

<b>Section V. Experiments and Theory</b>	
V.A. Neutron Total Cross Section Measurements <i>By D. W. Miller</i>	
V.B. Angular Distributions of Scattered Neutrons <i>By Martin Walt</i>	
V.C. Optical-Model Theory of Neutron Scattering and Reactions <i>By W. S. Emmerich</i>	
V.D. Direct Reaction Theories <i>By N. Austern</i>	
V.E. Resonance Processes with Fast Neutrons <i>By L. C. Biedenharn, E. Baumgartner, P. Huber, and H. B. Willard</i>	
V.F. Theory of Polarization in Reactions and Scattering <i>By T. A. Welton</i>	
V.G. Polarization of Neutrons from Reactions and Scattering <i>By W. Haeberli</i>	
V.H. Neutron Nonelastic Collision Cross Sections <i>By R. C. Allen, R. E. Carter, and H. L. Taylor</i>	
V.I. Excitation Functions for Neutron Inelastic Scattering <i>By J. Guernsey and D. A. Lind</i>
