

CONTENTS

○ Experimental Investigations of the Structure of  
Highly Ionized Atoms. . . . . 1  
I. Martinson

○ Highly Ionized Atoms in Tokamak Discharges. . . . . 49  
E. Hinnoy

Relativity in Electronic Structure: How and Why? . . . . . 75  
J.P. Desclaux

Relativistic and QED Effects in Highly Ionized  
Atoms. . . . . 113  
G.W.F. Drake

○ Electron Excitation Processes and Quantum  
Electrodynamics in High-Z Systems. . . . . 177  
G. Soff, Udo Müller, Theo de Reus, Paul Schlüter, Andreas  
Schäfer, Joachim Reinhardt, Berndt Müller, and Walter Greiner

Positron Production in Heavy Ion-Atom Collisions. . . . . 245  
H. Backe

○ Inner Shell Electrons in Superheavy Quasiatoms. . . . . 291  
F. Bosch

○ Inner Shell Capture in the Intermediate Velocity  
Range. . . . . 323  
C.L. Cocke

Charge Exchange Processes Involving Multicharged  
Ions: The Quasimolecular Approach. . . . . 365  
M. Barat

Electron-Ion Collisions. . . . . 399  
D.H. Crandall

Production of Multiply Charged Ions for Experiments in Atomic Physics. . . . .	455
H. Winter	
◦ Channeling of Ions and Electrons in Crystals and Radiation from Channeled Electrons. . . . .	517
J.U. Andersen	
Theory of Low Energy Electron-Ion Processes for Medium to Highly Charged Ions. . . . .	537
J. Dubau and C.J. Zeippen	
Contributors . . . . .	567
Index. . . . .	569
