### Section VI. RADIODEVICE SYSTEMS FOR ACCELERATORS

Yu. S. IVANOV et al. RF beam-control system of the 70-GeV proton synchrotron . . . . .	3
V. A. UVAROV. Apparatus for measuring the betatron oscillation frequency of the 70-GeV proton synchrotron beam . . . . .	8
N. I. ANDRYUSHCHENKO-LUTSENKO et al. Problems associated with the use of digital computers for accelerator operation control . . . . .	12
B. P. MURIN et al. Automatic cavity tuning system and phase stabilization of the accelerating fields in the I-100 linear accelerator . . . . .	17
A. M. GRISHIN. An experimental system for automatic phase stabilization of accelerated bunches on the operating JINR cyclotron . . . . .	23
A. Z. BABAYAN et al. Logics for beam control of individual parameters of the Erevan synchrotron . . . . .	27
A. Z. BABAYAN et al. Method of measuring the instantaneous values of the beam coordinates in the accelerating chamber . . . . .	31
A. I. VAGIN et al. Synchronization system of the IHEP accelerator . . . . .	36
S. V. CHIRKOV. Radial and phase beam positioning device for the 70-GeV proton synchrotron . . . . .	43
Yu. D. BOL'SHAKOV et al. Orbit monitoring system for the 70-GeV proton synchrotron . . . . .	47
B. P. MURIN et al. Multichannel timer device for the I-100 linear accelerator . . . . .	53
L. G. LOMIZE et al. Apparatus for measuring the main parameters of the proton beam in the I-100 linear accelerator-injector system . . . . .	60
D. G. BORISOV et al. Startup of an accelerator by a pair of pulses . . . . .	67
G. A. BOKOV et al. Control system for a beam of accelerated particles in the JINR proton synchrotron . . . . .	73

## Section VII. HIGH-POWER RADIO-ENGINEERING FACILITIES AND ACCELERATING SYSTEMS

V. G. ANDREEV. Modern RF accelerating systems for proton linear accelerators . . . . .	81
V. G. KUL'MAN et al. Tuning of the cavities of a proton linear accelerator . . . . .	86
Yu. D. IVANOV et al. Stabilization of the RF field in proton linear accelerators during the acceleration of high-intensity pulsed beams . . . . .	93
B. M. GUTNER et al. Accelerating cavities and high-power RF excitation facility of the IHEP 70-GeV proton synchrotron . . . . .	99
A. I. VAGIN et al. Transient processes in the automatic frequency control (AFC) system of the accelerating sections of the IHEP 70-GeV proton synchrotron . . . . .	105
M. S. DAVYDOV et al. Alignment of the accelerating system of the Erevan synchrotron . . . . .	111
E. A. DUDKOVSKII et al. RF power supply facility for the cavities of the Erevan synchrotron . . . . .	116
G. I. BATSKIKH et al. Aperiodic wide-band accelerating system . . . . .	120
L. Z. BARABASH et al. Increase in the particle capture efficiency in a proton synchrotron by using the second harmonic in the accelerating field . . . . .	126
Yu. N. ANTONOV et al. The accelerating system of the 1000-GeV cybernetic proton accelerator . . . . .	132
F. A. VODOP'YANOV et al. Generation of the accelerating field of the booster of the 1000-GeV cybernetic proton accelerator . . . . .	137
E. I. GORNIKER et al. High-frequency power supply for the VEPP-2 storage ring . . . . .	144
V. G. VESHCHEREVICH et al. Accelerating resonator for the VEPP-2 electron-positron storage ring . . . . .	149
O. A. VAL'DNER et al. Waveguide accelerating system of the 1000-GeV cybernetic accelerator . . . . .	155
G. P. AVER'YANOV et al. RF tolerances of the waveguide accelerating sections of the 1000-GeV cybernetic accelerator . . . . .	159
V. P. ZUBOVSKII et al. Experimental study of the RF properties of a structure loaded with parallel rods . . . . .	164
V. N. GUSAROV et al. Theoretical and experimental study of an iris-loaded waveguide with a dielectric tube . . . . .	168
V. A. BOMKO et al. Accelerating system excited in the $H_{111}$ -mode . . . . .	172
V. A. BOMKO et al. Double-beam accelerating system excited in the $E_{110}$ -mode . . . . .	178
O. A. VAL'DNER et al. Calculation of a constant-gradient accelerating section . . . . .	183

O. A. VAL'DNER et al. Experimental plots for the calculation of an iris-loaded waveguide . . . . .	190
O. A. VAL'DNER et al. Plots for the calculation of the main parameters of electron linear accelerators with $\theta_w = 1$ using iris-loaded waveguides . . . . .	196
E. V. AVDEEV et al. Investigation of the properties of natural waves in an iris-loaded waveguide . . . . .	201
A. A. GLAZKOV et al. RF problems associated with the development of a waveguide separator for the cybernetic accelerator . . . . .	209
A. K. ORLOV. Hybrid waves in an iris-loaded waveguide with slotted disks . . . . .	217
M. F. VOROGUSHIN. Singularities of the calculation of high-current resonant electron accelerators . . . . .	221
Yu. D. IVANOV et al. Operation of the RF power supply system of the I-100 injector of the Serpukhov proton synchrotron . . . . .	227
L. V. NIKOLAEV et al. Pulsed modulator of the RF power supply system of the I-100 linear accelerator . . . . .	235
