

C O N T E N T S

Chapter 1. NEW MACHINES

*Current status of the Indiana University cyclotron facility M.E. Rickey	1
*Future cyclotrons H.G. Blosser	16
*Alternates to the cyclotron for heavy-ion acceleration J.A. Martin	33
A proposed national heavy-ion accelerator at Oak Ridge J.A. Martin, E.D. Hudson, R.S. Lord, M.L. Mallory, W.T. Milner, S.W. Mosko and P.H. Stelson	54
A combination of a Van de Graaff accelerator and a split-pole cyclotron for heavy ions B. Efken, D. Hilscher, H. Homeyer, O. Jahnke, K.H. Lindenberger, H.-E. Mahnke, K.H. Maier, J.A. Scheer and S. Holm	63
Magnetic field properties of the Indiana isochronous cyclotron R.E. Pollock	69
Design study for a compact 200 MeV cyclotron M.M. Gordon, H.G. Blosser and D.A. Johnson	78
The Kiev 240 cm isochronous cyclotron V.V. Kolotiy, A.F. Linev, A.I. Malofeev, M.V. Pasechnik, V.A. Pashin, V.A. Saenko, Yu.G. Basargin, A.S. Fedorov, V.A. Glukhikh, O.A. Gusev, E.G. Komar, R.N. Litunovsky, I.F. Malishev, O.A. Minyaev, B.V. Rozhdestvensky and A.V. Stepanov	87
TRIUMF central region cyclotron progress report E.W. Blackmore, G. Dutto, M. Zach and L. Root	95
103-cm compact isochronous cyclotron Yu.G. Basargin, P.V. Bogdanov, I.I. Finkelstein, A.N. Galaev, A.V. Galchuk, V.A. Glukhikh, O.A. Gusev, I.F. Malishev, A.V. Popov, A.V. Stepanov and Yu.I. Stogov	102
Status report on the variable energy cyclotron at Calcutta D.N. Kundu	107
Status report on the Catholic University of Louvain cyclotron Y. Jongen, P. Macq, P. Delphin, A. Dupuis, B. Hurt, L. Marniquet and P. Peironet	110
Chapter 2. MESON FACTORIES	
*Status report on the SIN ring cyclotron H.A. Willax	114
*Invited papers	

*The present status of TRIUMF J.R. Richardson	126
*LAMPF - status and capabilities L. Rosen <i>Paper not available for publication</i>	
Chapter 3. SYNCHROCYCLOTRON CONVERSIONS	
*Status of the CERN synchrocyclotron improvement programme and plans for physics facilities E.G. Michaelis	141
*Status of the Nevis synchrocyclotron modification J. Rainwater	165
*Status report on the 680 MeV Dubna synchrocyclotron reconstruction Yu.N. Denisov	179
Chapter 4. INJECTION	
*Cyclotron injection systems D.J. Clark	191
Status report on axial injection in the Grenoble cyclotron J.L. Belmont, J.M. Bois, J. Fermé	204
An improved Birmingham polarized deuteron source and injection of the beam into the cyclotron G. Guest, W. Hardy, S. Oh and W.B. Powell	211
The ion source and injection system (ISIS) for the TRIUMF central region model (CRM) B.L. Duelli, W. Joho, V. Rödel and B.L. White	216
Filling of the phase space in the central region of a synchrocyclotron D. Thouroude	226
Chapter 5. HEAVY ION ACCELERATION	
*Acceleration of Xe ions in the JINR tandem-cyclotrons I.A. Shelaev, V.S. Alfeev, B.A. Zager, S.I. Kozlov, I.V. Kolesov, V.N. Mel'nikov, R.Ts. Oganesian, A.N. Filipson and V.A. Chugreev	232
*Results obtained from ALICE and future prospects E. Baron, C. Bieth, M.P. Bourgarel, A. Cabrespine, Ch. Goldstein and T. Junquera	243
Heavy ion beams at the Texas A&M cyclotron using a cold-cathode source R.A. Kenefick, W.W. Chapman and E.P. Chamberlin	258
Heavy ion acceleration at the Berkeley 88-inch cyclotron D.J. Clark, J. Steyaert, J. Bowen, A. Carneiro and D. Morris	265

The ORIC as a heavy-ion injector for a separated sector cyclotron	274
E.D. Hudson, R.S. Lord, M.L. Mallory and P.H. Stelson	
A variable frequency linac and its use as an injector for a separate sector heavy ion cyclotron	283
M. Odera and T. Tonuma	
Chapter 6. INTERNAL BEAM QUALITY	
An optimized multi-particle central region for the Michigan State University isochronous cyclotron	291
L.L. Learn, H.G. Blosser and M.M. Gordon	
Application of a new field trimming program to the MSU cyclotron	298
M.M. Gordon and D.A. Johnson	
Accelerating system of isochronous cyclotron with a non-sinusoidal electric field	308
M. Kuzmiak, H. Hrdá, V. Bejsovec, M. Krivánek, Z. Trejbal and V.V. Kolga	
The aspects of optimization of beam acceleration and extraction conditions in cyclotron with external "active" monochromatization system	315
Yu.G. Basargin, R.N. Litunovsky, Yu.P. Severgin and N.I. Venikov	
Some peculiarities of longitudinal motion of the particles in an isochronous cyclotron	322
Yu.G. Basargin, R.N. Litunovsky, O.A. Minyaev and V.I. Vasil'ev	
Effects of axial misalignment of the dees and their correction	329
M.K. Craddock, G. Dutto and C. Kost	
Optimization of the phase acceptance of the TRIUMF cyclotron	340
G. Dutto, C. Kost, G.H. Mackenzie and M.K. Craddock	
The effect of certain magnetic imperfections on the beam quality in TRIUMF	351
J.L. Bolduc and G.H. Mackenzie	
Methods of beam pulsing applied at the Karlsruhe isochronous cyclotron	358
W. Kappel, J. Möllenbeck and H. Schweickert	
Modifications to the University of Michigan 83-inch cyclotron to improve beam quality	366
W.C. Parkinson, W.S. Gray, J.F. Petersen and R.H. Day	
Orbit studies for the Indiana University cyclotron	374
W.P. Jones, D.L. Friesel and B.M. Bardin	

Resonant depolarization effects for polarized beams in the Indiana University cyclotron	379
P.J. Moffa, A.D. Bacher, W.P. Jones and P. Schwandt	
A comparison of various geometries of a separated-sector cyclotron	384
V.N. Kanunnikov and V.A. Papadichev	
Chapter 7. EXTERNAL BEAMS	
A design study for split beam operation of the Indiana University cyclotron facility	393
R.E. Pollock, D.L. Friesel and D.W. Devins	
A system for emittance measuring and monitoring at the Jülich isochronous cyclotron	399
J. Bojowald, H. Borsch, W. Kuhlmann, J. Reich and A. Retz	
The Jülich double-monochromator system	407
J. Reich, C. Mayer-Böricke, S. Martin, K.L. Brown and F.E. Johnson	
Determination of non-linear components in corpuscular-optical elements by incremental Hall-probe measurement taking into account systematic errors due to longitudinal field components and sag of the probe arm	415
V. Jung	
Cryopumping tests for the Indiana University 200 MeV cyclotron beam line	419
H. Herman and J.A. O'Neil	
Transfer matrix method for computing depolarization effects of a polarized proton beam in a transport system	425
D. Rapin, R. Hess, J.-C. Niklès, and D.W. Werren	
Optimized use of a cyclotron for high resolution studies of nuclei	430
E. Kashy, H.G. Blosser and D.A. Johnson	
Chapter 8. RF SYSTEMS	
Frequency stabilization of the Texas A&M cyclotron by injection locking	438
R.C. Rogers, J.S. Chenoweth and J.M. Cox	
Some aspects of the control and stabilization of the RF accelerating voltage in the TRIUMF cyclotron	444
K.L. Erdman, K.H. Brackhaus and R.H.M. Gummer	
TRIUMF RF amplifier and resonator system	451
K.L. Erdman, R. Poirier, O.K. Fredriksson, J.F. Weldon and W.A. Grundman	
The wide-band driven RF system for the Berkeley 88-inch cyclotron	459
W.S. Flood and P.E. Frazier	

Results of measurements on a 50 MHz cavity driven by a 250 kW power amplifier and the present status of the RF system of the SIN cyclotron	467
P. Lanz	
Chapter 9. COMPUTER CONTROL & DIAGNOSTICS	
The TRIUMF control system	476
J.V. Cresswell, D.R. Heywood, D.P. Gurd, R.R. Johnson and W.K. Lacey	
CAMAC controls applications at TRIUMF	485
H. Dollard, D.R. Heywood, D.E. Marquardt, D.P. Gurd and R.R. Johnson	
Computer control of the Indiana University cyclotron facility	490
B.M. Bardin, S.A. Lewis, D.J. Plummer and T.E. Zinneman	
Computer control system for ORIC	500
C.A. Ludemann, J.M. Domaschko and S.W. Mosko	
Standard control component to computer control by SIN cyclotron	510
L.J. Besse	
The automatic control of the Eindhoven A.V.F. cyclotron	515
I Measuring equipment	
F. Schutte, L.C.J. Baghuis, H.L. Hagedoorn, D.M.J. Kroonenberg and J.F.P. Marchand	
The automatic control of the Eindhoven A.V.F. cyclotron	524
II Measurements	
F. Schutte, H.L. Hagedoorn, G.C.L. van Heusden and J.A.J.M. van Vliet	
A new beam-spill control system for LAMPF	531
J.R. Parker, J.H. Richardson and J.D. Easley	
Panel discussion	538
Chapter 10. APPLICATIONS	
*Fast neutron therapy	562
R.L. Morgan	
*Medical uses of the Harvard University cyclotron: an overall view	578
R. Wilson	
*Medical treatment and diagnosis using 160 MeV protons	586
A.M. Koehler	
*Design studies for a 200 MeV proton clinic for radiotherapy	603
S. Graffman, B. Jung and B. Larsson	
*Compact cyclotron engineering for application	616
G.O. Hendry	

*The Argonne Cancer Research Hospital cyclotron P.V. Harper, L.S. Skaggs, J. Porter, N. Lembares, H. Forsthoff, H. Krizek, K.A. Lathrop and F. Kuchnir	627
Design of a neutron therapy facility for a 30-inch cyclotron F.T. Kuchnir, L.S. Skaggs, A.J. Elwyn, F.P. Mooring and N.A. Frigerio	638
Medical applications of cyclotron procedures: total body calcium as determined by neutron activation analysis C.H. Chesnut III, W.B. Nelp and J.D. Denney	646
Nuclear medicine uses of TRIUMF R.T. Morrison and E.K. Mincey	650
Selection of the size of a cyclotron for medical applications M.A. Chaudhri, A.J. Chaudhri and Q.J. Chaudhri	656
*Application of cyclotrons in materials science R.S. Nelson	664
*Applications of accelerators in physics and chemistry T.A. Cahill	677
Some applications of the Eindhoven A.V.F. cyclotron L.C.J. Baghuis, A.M.W. Duys, H.L. Hagedoorn and M. Prins	682
 Closing remarks	687
Appendix A: Cyclotrons-1972, AVF and FM	689
List of registrants	830
Author index	834
