

TABLE OF CONTENTS

PREFACE	VII
1. W.O. Hofer Physical Sputtering of Elemental Metals and Semiconductors	1
2. O.F. Goktepe Ion Implantation Mechanisms and Related Computational Issues	25
3. R. Kelly and A. Oliva The Theory of the Preferential Sputtering of Alloys, Including the Role of Gibbsian Segregation	41
4. G. Carter Theory of Surface Erosion and Growth	70
5. G. Betz and W. Husinsky On the Composition of the Sputtered Flux from Metal Targets and their Compounds	98
6. M.J. Nobes Geometric Methods of Analysis	103
7. R. Smith and M.A. Tagg Surface Topographical Evolution: Computational Methods of Analysis	121
8. B. Baretzky and E. Taglauer Preferential Sputtering of Tantalum Oxide: Reemission of Helium and Transient Effects in the Altered Layer	146
9. J.L. Whitton Experimental Studies of Morphology Development	151
10. L. Tanovic, N. Tanovic, and A. Zalar Investigation of Microtopography Induced during Sputter Depth Profiling of Ni/Cr Multilayered Structures	174
11. S.M. Rossnagel Effects of Surface Impurities and Diffusion on Ion Bombardment-Induced Topography Formation	181
12. A. van Veen Ion Trapping and Cluster Growth	200

X

13. B.M.U. Scherzer Bubbles, Blisters, and Exfoliation	222
14. E. Kay Examples of Ion Bombardment Effects on Film Growth and Erosion Processes - Plasma and Beam Experiments	247
15. J.M. Rigsbee, P.A. Scott, R.K. Knipe, and V.F. Hock On the Modification of Metal/Ceramic Interfaces by Low Energy Ion/Atom Bombardment during Film Growth	275
16. C.J. Heslop Plasma Etching for Silicon Device Technology	281
17. S. Dzioba Reactive Ion Etching of GaAs and Related III-V Compounds	297
18. L. Calliari, F. Giacomozzi, L. Guzman, B. Margesin, and P.M. Ossi Ion Beam Enhanced Deposition and Dynamic Ion Mixing for Surface Modification	316
19. A. Christou Molecular Beam Epitaxy and Selective MBE Deposition of GaAs Device Structures	324
20. W.L. Brown Applications of Ion Beams in Microlithography	338
21. J. Salmi, J. Knuutila, and R. Mutikainen In Situ Ion Beam Processing for Josephson Junction Fabrication	366
22. C.J. McHargue Effect of Ion Implantation on Subsequent Erosion and Wear Behavior of Solids	370
23. O. Auciello Problems, Prospects and Applications of Erosional/Depositional Phenomena	394
24. S. Kostic, G. Kiriakidis, M.J. Nobes, and G. Carter The Influence of Incidence Angle on Damage Production in In^+ Ion Implanted Si	423
25. S. Kostic, W. Begemann, G. Carter, D.G. Armour, and M.J. Nobes Striation Production by Grazing Ion Incidence on Si	430
26. N. Georgoulas Influence of Lattice Defects Produced by Ion Implantation on Electrical and Optical Properties of Bulk-Barrier-Diodes	435
27. W. Huang, J. Onsgaard, and M. Szymonski Influence of the Target Environment on Angular Distribution of Sputtered Particles	440

28. J.A. Kubby and B.M. Siegel Simulation of Near Atomic Scale Sputter Induced Morphology	444
29. G. Kozlowski and A. Ciszewski Epitaxy of Erbium on Tungsten	453
30. C. Pellet, C. Schwebel, F. Meyer, and G. Gautherin Growth of Thin Films by UHV Ion Beam Sputtering Deposition Technique	457
31. L.D. Stephenson, V.F. Hock, J.M. Rigsbee, D. Teer, and D. Arnell Microstructural Analysis of Electronically Conductive Ceramic Coatings Synthesized by Reactive Ion Plating and Sputter Deposition	461
